

**PROTECTION &
SANITIZING EXPERTS
SINCE 1968**

Introduction

The history of Al Sharhan Industries traced back to 1968 when the late Ahmed Abdulla Al-Sharhan procured a license to produce aerosol products for Al-Sharhan Aerosol Manufacturing Establishment. With unwavering vision and a keen business acumen, he immersed himself into the project, and in March 1968, Al Sharhan Industries came into being.

As the first brand to be established under Al Sharhan Industries, KWIK started in 1967 by producing air fresheners and insecticides. A few years later, the Kuwait famous LULU brand was launched and was the first ever dishwashing liquid available in Kuwait. Since then Al Sharhan Industries has upgraded and introduced a number of brands such as Delta, Best Fresh, Cobra, and Wenpor.

Today, ASI manufactures over 300 products specs of Aerosols , medical disinfectant , liquid detergent , perfumes and plastic in a massive 25,000 SM facility that is located in Shuaiba Industrial area and equipped with 25 production lines to meet the ever increasing demand on our products and market share expansion

Our experience in the international markets has given us great knowledge and understanding of our customers and market needs in countries all the way from Europe, Africa, Asia and the Middle East.

Our products are available for retail and wholesale globally, and are now sold in more than 35 countries.

This brochure aims to give you a quick rundown of our history and evolution, and an insight into our products, which have penetrated not just local markets but the Middle East and North Africa as well. The coming pages will unravel to you the story of a visionary's dream which went on to set new standards in the realms of hygiene.

Private Label

We are a member at the PLMA (Private Label Manufacturing Association) since 2005 and have gained considerable experience in offering private label services for retailers, multinationals and smaller brand owners. We do everything including designing, packaging, and QC to provide you with best aerosol and liquid detergent products at the most competitive rates.

Our private label service is available at international standards; we can also accommodate your own specifications and formulas.

Certificates for products are provided upon request.

Why retailers and brand owners prefer private label service:

1. Control over pricing of the product/service.
2. Put forth own ideas on marketing plans.
3. Create personalized image which in turn leads to higher customer loyalty.
4. Higher control on production, marketing distribution and profits.
5. Give their own inputs, additional materials, logos, tag lines etc.
6. Customers' changing preference favor private label products.

Quality Control & Lab

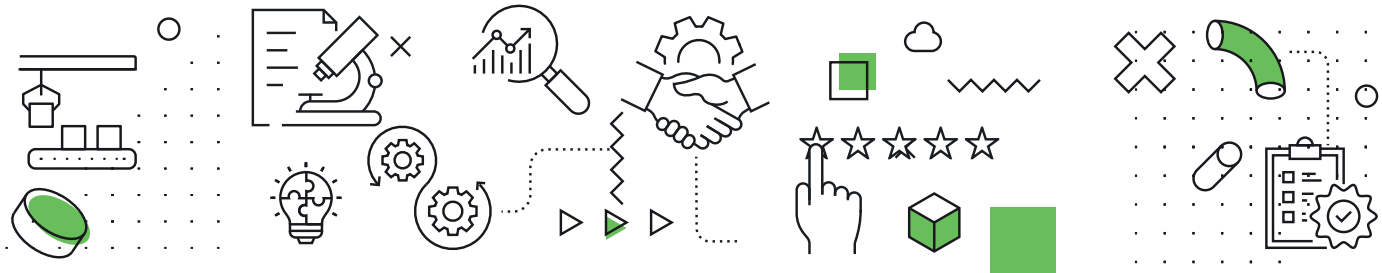

Guaranteed product quality and consistency do the very foundations of ASI success, with customers rightly trust our long established brands, It's no surprise! that Quality Control is given the highest priority in all aspects of our operation.

A team of highly trained quality inspectors with advanced testing equipment continuously monitors our production lines.

Our quality consciousness has enabled us to become an ISO 9001:2015, ISO 14001:2015 & GMP certified. Our products are only tested in accredited labs & approved by MOH in Kuwait and other GCC countries

The raw materials we utilize are only obtained from ISO9001 or ISO9002, CE, GS, UL certified companies.

We guarantee 100% quality of all our products through constant inspections. The finished products are subject to ageing tests to assure the durability in different environments, for example when exposed to high or low temperatures and pressures as well as lack or excess of moisture.

Production Capabilities

Aerosol

Two major filling lines with a total capacity of 50 million cans per year, capable of handling 35, 45, 52, 57 and 65 mm and fill volumes between 50 and 650ml in tinplate cans; the line features fully automatic filling, weight checking, hot bath leak checking, actuator placing, capping and shrink wrapping. Our secondary filling line can handle short runs for both tin plate and aluminum cans.

Liquid Detergent

Our liquid plant specializes in the production of a variety of liquid detergents such as dishwashing liquid, disinfectants, liquid soap, cleaners etc. our lines are designed to ensure product quality through a dedicated set of mixing and filling equipment for each product range. Liquid products are produced by an automatic, continuous process using fatty acid alkali neutralizer that feeds concentrated detergent to each batch. Batch mixing is carried out through stainless steel overhead pipes while filling is done through standard volumetric filling, automatic capping and labeling equipment.

Our lines can handle 50 ml to 200 liter fills in different container shapes and sizes; production capacity for liquid products is 9000 tons or 16 million units per year.

Al Sharhan Brands

Antiseptic Disinfectant

Throughout the years, Al Sharhan Industries has become one of the leading manufacturers in the region for hygiene products, namely the Antiseptic Disinfectant.

The Antiseptic Disinfectant is a trusted product that is registered in MOH Kuwait. It is a multipurpose cleaner that can be used for household, personal hygiene and medical uses, and has outstanding power to kill a wide range of unseen germs to protect your family and children.
