MILLING

We are world leader in the production of machines and equipment for weighing, bagging and packaging flour.

We are able to meet all flour packaging and bagging needs, from the small 500 g bag to the big-bag, by way of the most commonly used bag sizes of 1, 2, 5, 10, 25 and 50 kg, etc.

Thanks to their flexibility, our machines are able to weigh, bag and package the traditional wheat flours, cornmeal, rice and buckwheat flours, oatmeal and pulse flours (and the more unusual carob, yam, etc. flours).

Our company is closely associated with Ocrim SpA, world process leader.

Together, we are world leaders in the turnkey supply of your super-efficient new plant.

STARCH AND GLUTEN

Everywhere in the world, those who process starch and gluten know and often use Paglierani complete lines equipped with weighers, bagging and packing machines, palletizers and belt conveyors.

Manufactured with extreme engineering know-how, they grant high performances in the processing quantity and quality and in the control of the operating costs.

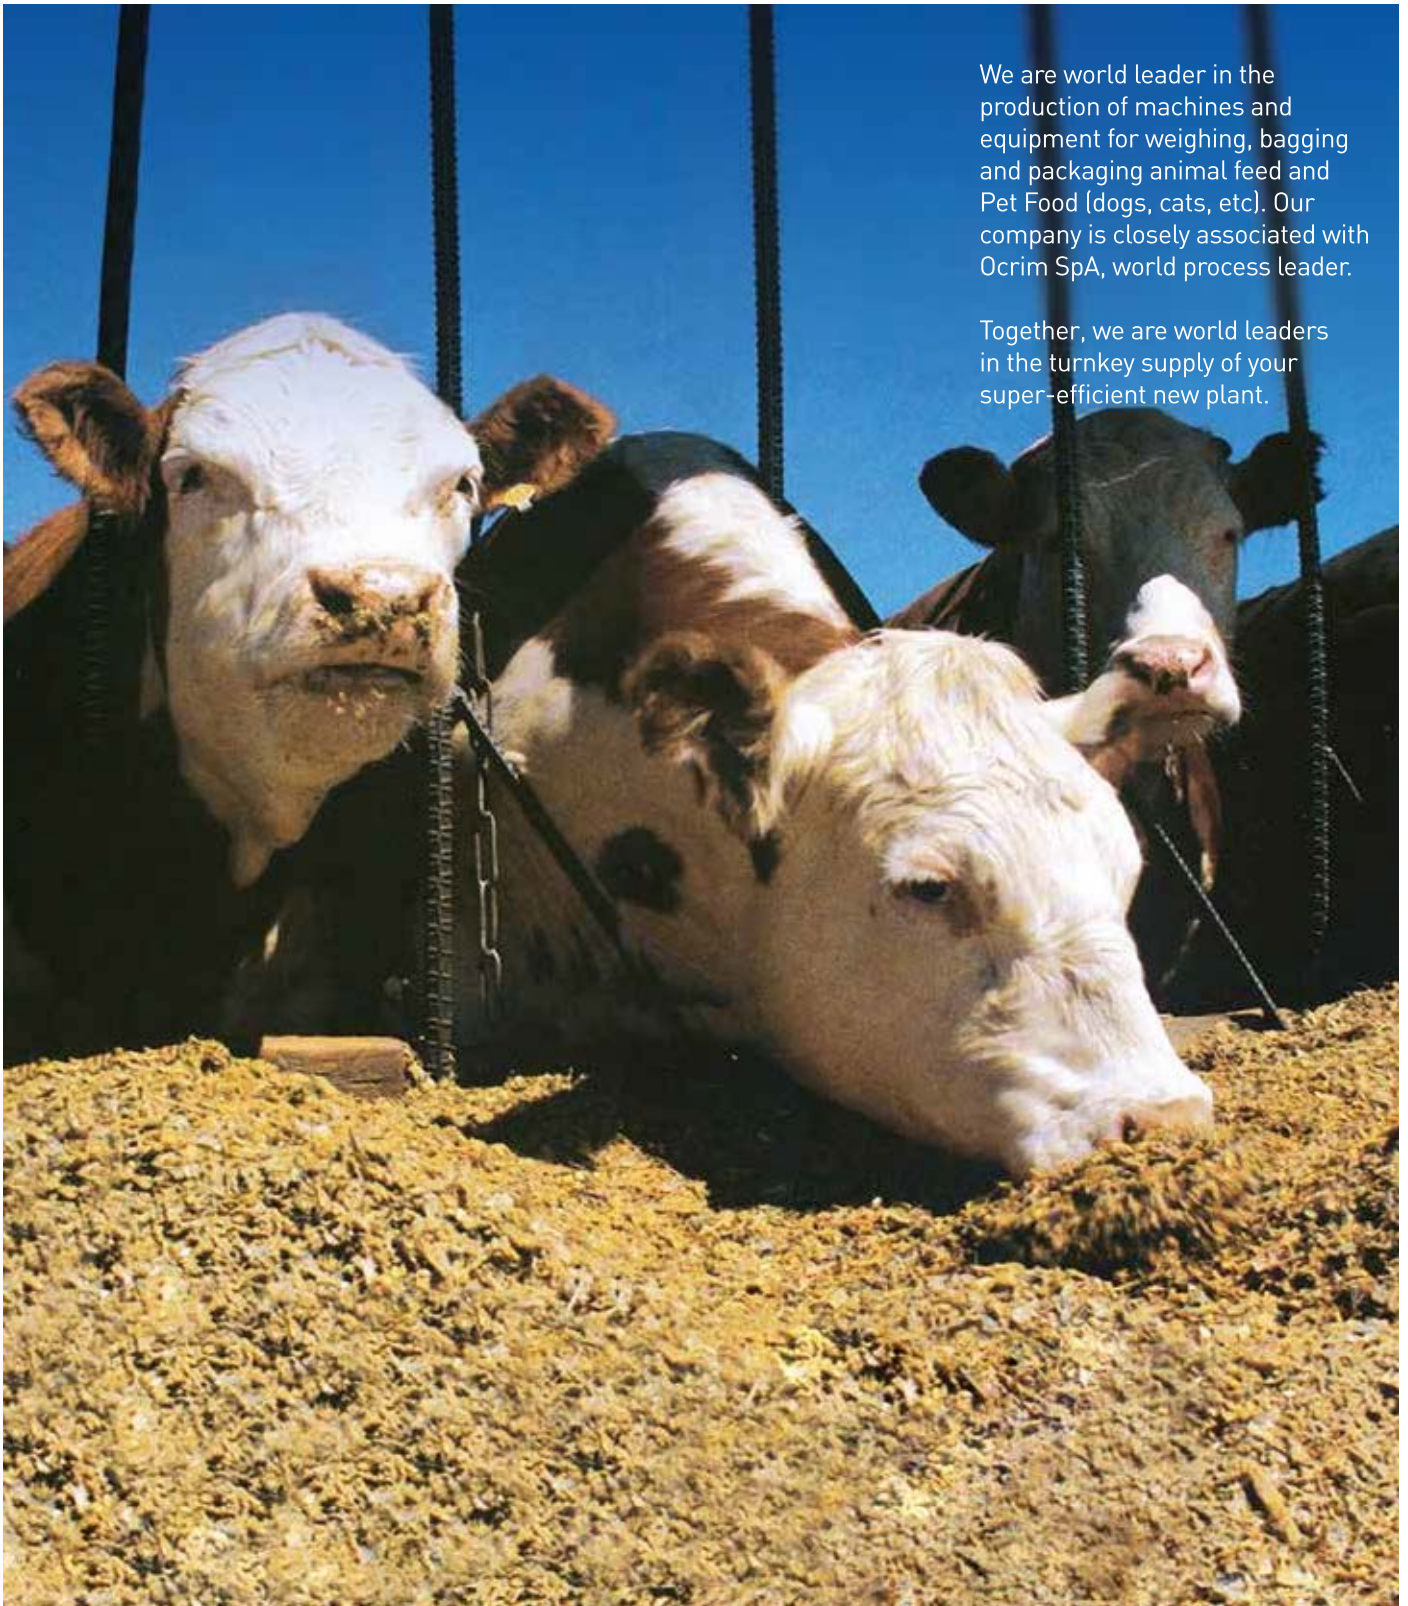

ANIMAL FEED

We are world leader in the production of machines and equipment for weighing, bagging and packaging animal feed and Pet Food (dogs, cats, etc). Our company is closely associated with Ocrim SpA, world process leader.

Together, we are world leaders in the turnkey supply of your super-efficient new plant.

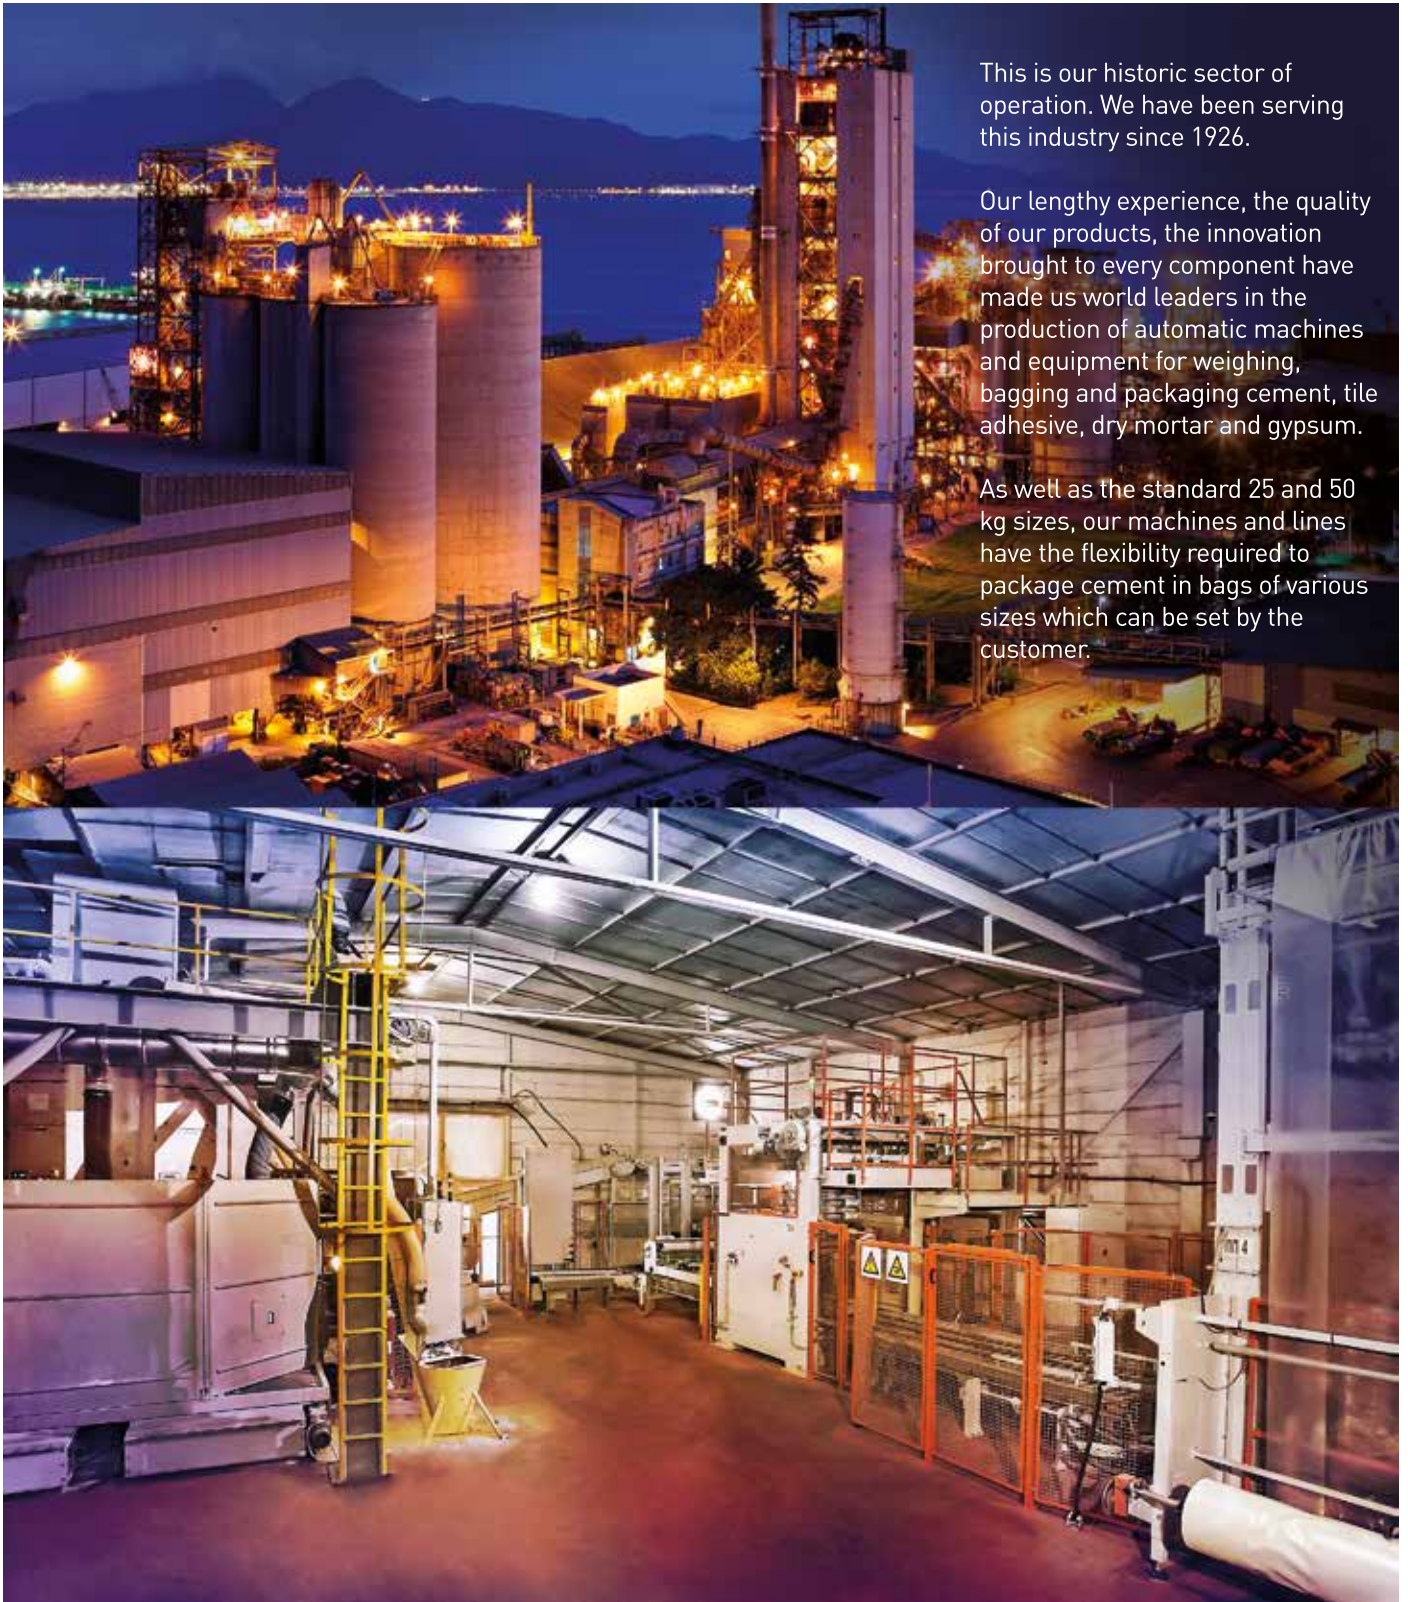

CEMENT AND ASSOCIATED PRODUCTS

This is our historic sector of operation. We have been serving this industry since 1926.

Our lengthy experience, the quality of our products, the innovation brought to every component have made us world leaders in the production of automatic machines and equipment for weighing, bagging and packaging cement, tile adhesive, dry mortar and gypsum.

As well as the standard 25 and 50 kg sizes, our machines and lines have the flexibility required to package cement in bags of various sizes which can be set by the customer.

CHEMICALS AND PETROCHEMICALS

We produce automatic machines and lines for weighing, bagging and packaging chemical and petrochemical products.

Paglierani is an industry player highly respected by the world's main contractors and engineering companies.

Because we have experience, we know the rules back to front, and our know-how is second to none.

Our business partners call it the Paglierani Savoir-Faire.

FERTILIZERS

We produce complete lines and machines for weighing, bagging and packaging fertilizers and mulches, which can be packaged in bags of various sizes set by the customer (1, 5, 25, 50 kg, etc).

Paglierani bagging and packaging machines are able to process various types of fertilizers:

- organic, including humus, compost, peat and bark,
- mineral,
- chemical.

Machines and lines that generate the best returns on investment.

The quality of our design and materials always ensure unbeatable efficiency. That's why we have references all over the world. Probably somewhere near you.

We produce equipment and machines for weighing, bagging and packaging salt. Sea salt and rock salt, handled gently by machinery developed through in-depth knowledge of the product and process.

Our machines are therefore able to weigh, bag and package sea, mineral and rock salt in all the standard bag sizes: 0.5, 1, 10, 25 kg and over, up to big bags (500, 1000, 1200 and 1500 kg).

Our plants are perfect for processing and conserving the machinery even in damp or aggressive environments. In other words, for letting you do business anywhere.

SUGAR

We produce systems and machines for weighing, bagging and packaging sugar.

From the smallest bag to the big bag, with customized machines that keep production costs down.

Our machines and lines are therefore able to weigh, bag and package refined or raw beet and cane sugar in the standard bag sizes: 500 g, 1, 2, 5, 10, 25, 30, 50, 60 and 100 kg and over, up to big bags.

This is how we have earned world leadership. This is how we have so far achieved more than 400 installations worldwide.

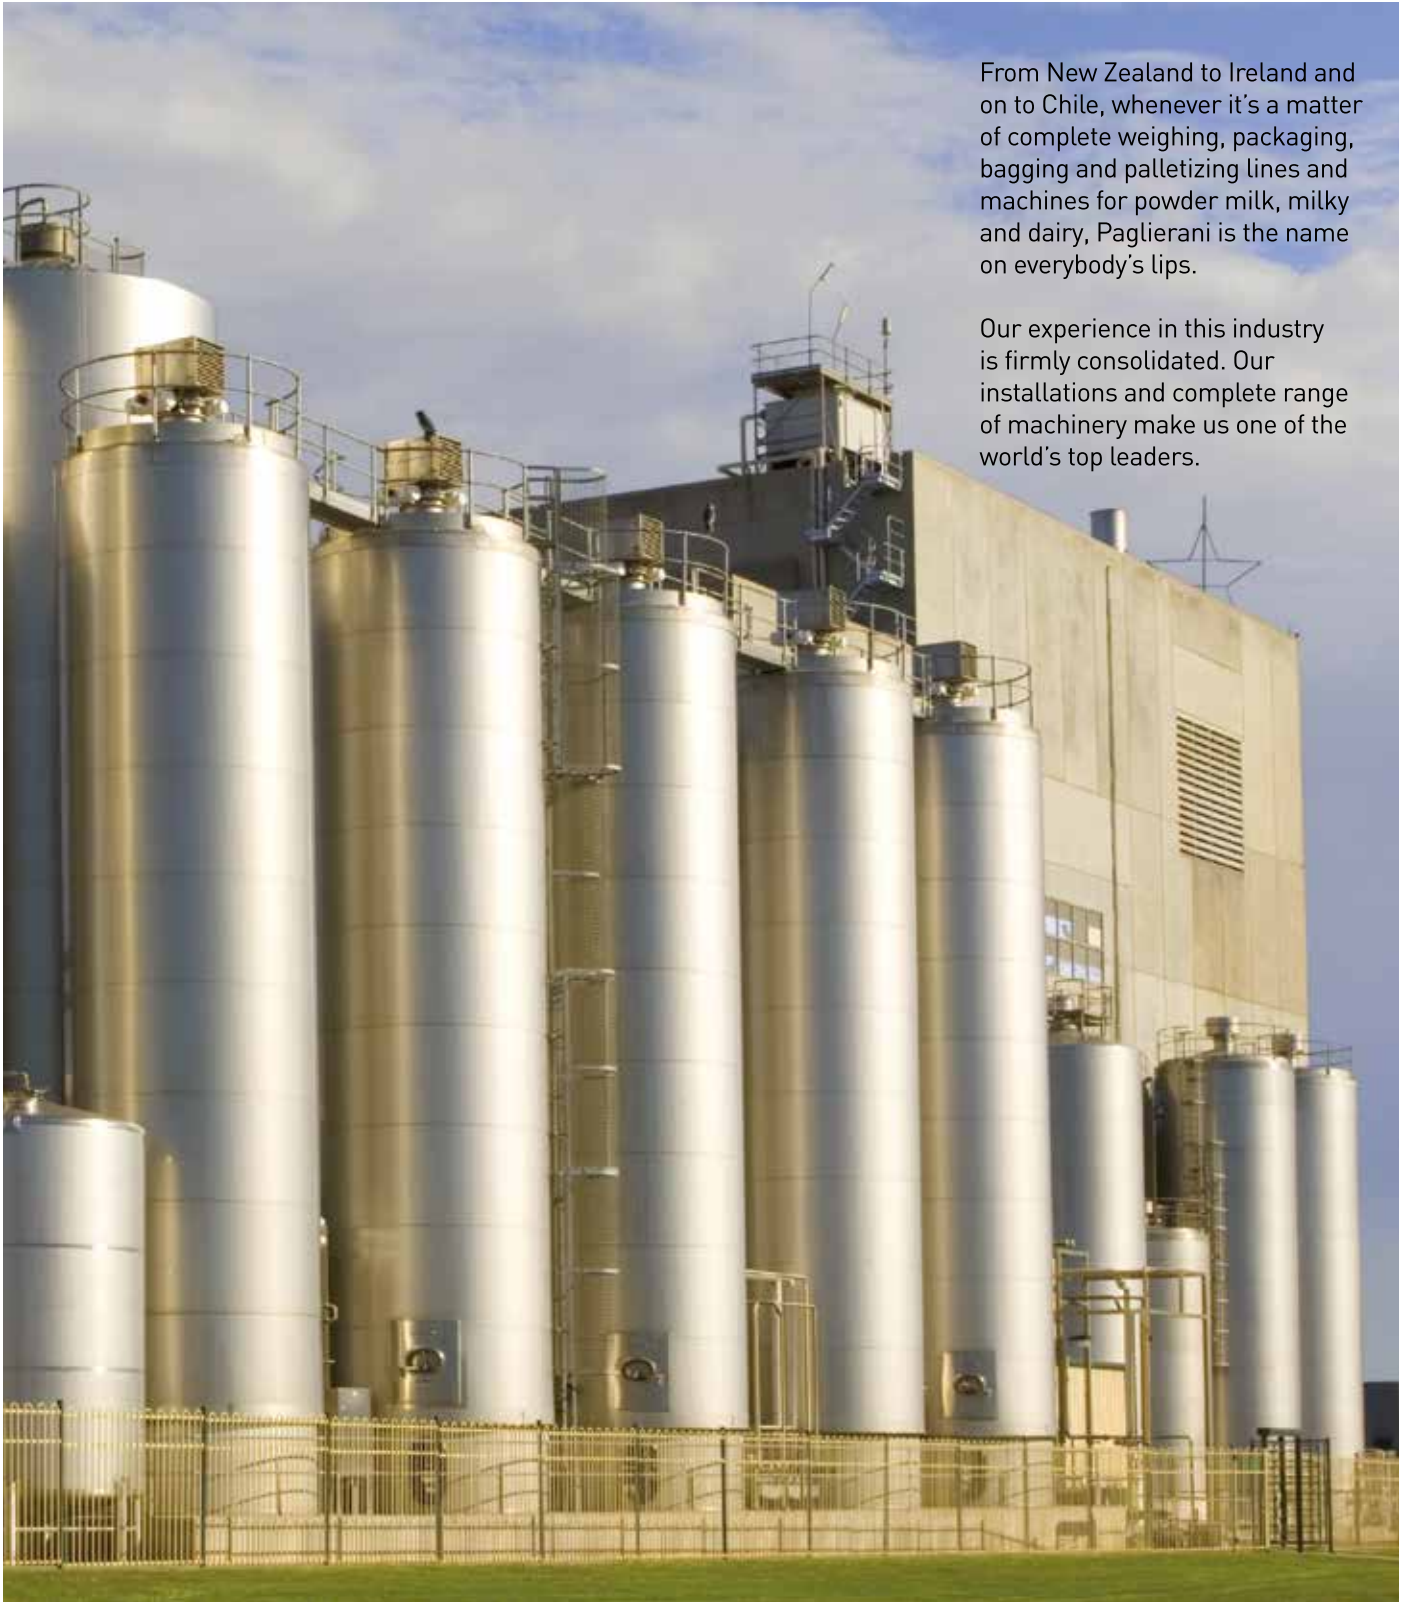

MILKY AND DAIRY

From New Zealand to Ireland and on to Chile, whenever it's a matter of complete weighing, packaging, bagging and palletizing lines and machines for powder milk, milky and dairy, Paglierani is the name on everybody's lips.

Our experience in this industry is firmly consolidated. Our installations and complete range of machinery make us one of the world's top leaders.

PLASTICS

Paglierani produces machines for weighing and bagging plastics in granules, pellets, flakes and powder form.

A complete range, hundreds of installations all over the world, and the Savoir-Faire that comes from more than 40 years in the specific industry.

In short, this is what Paglierani provides for this sector.

Process weighing (downstream of extruders) bagging, (for valve, open-mouth and form-fill-seal bags or big bags).

This is what Paglierani does for this sector.

Why choose Paglierani for Pet Food?

Because it produces customized machines for weighing, bagging and packaging Pet Food (dogs, cats, birds, etc), that offer high performance, capable of ensuring flexibility in pack sizes, with the right response to the marketing's demands.

From 500 grams to 25 kg (by way of 1, 2, 5 and 10 kg), from preformed to form-fill-seal bags through to palletizing and wrapping processes. With the Paglierani quality. And it has done so for more than 20 years.

GRAINS

Paglierani has been building success for the grain industry for 90 years.

From weighing for monitoring purposes in ship unloaders to mobile bagging stations (installed in a container, ready for use on the quayside during unloading) from the complete line for grains for animal feed or for sowing to the big bag filling line.

Not just corn, rice, oats, cereals and grains but also pulses and seeds of all kinds, which can be packaged in bags of various sizes set by the customer.

It has installed thousands of plants.

Top engineering firms and leading main contractors use Paglierani equipment and automatic machines for weighing, bagging and packing grains in their plants worldwide.

The Paglierani Savoir-Faire originated 90 years ago, in this very sector. And it has been world market leader for many years.

COFFEE

Machines and lines for weighing and bagging coffee beans: Paglierani has been building success for the coffee industry for 90 years.

From weight control weighing inside the ship unloader or on receipt of the bulk coffee to process control, through to complete lines for weighing, bagging, palletising, wrapping and handling bagged coffee.

Even with a big-bag filling line.

Every machine or line designed and built by Paglierani generates economic benefits, meaning competitive advantages, for the far-sighted coffee entrepreneurs who install it.

Paglierani's worldwide references guarantee its capabilities.

Paglierani's success is based on its Savoir-Faire.

This has made the Paglierani Brand world leader in the design, production and sale of coffee bean weighing and bagging lines and machines. For more than 20 years.

BIOFUEL PELLETS

Responding to the growing demand for fuels worldwide, Paglierani has developed a series of pellet weighing, bagging and palletising machines that meet all producers' packaging needs.

A large number of biofuels can be processed: wood (beech, chestnut, spruce, conifer and oak) pellets, sunflower husk pellets, straw pellets, olive pit and pomace pellets, and woodchips.

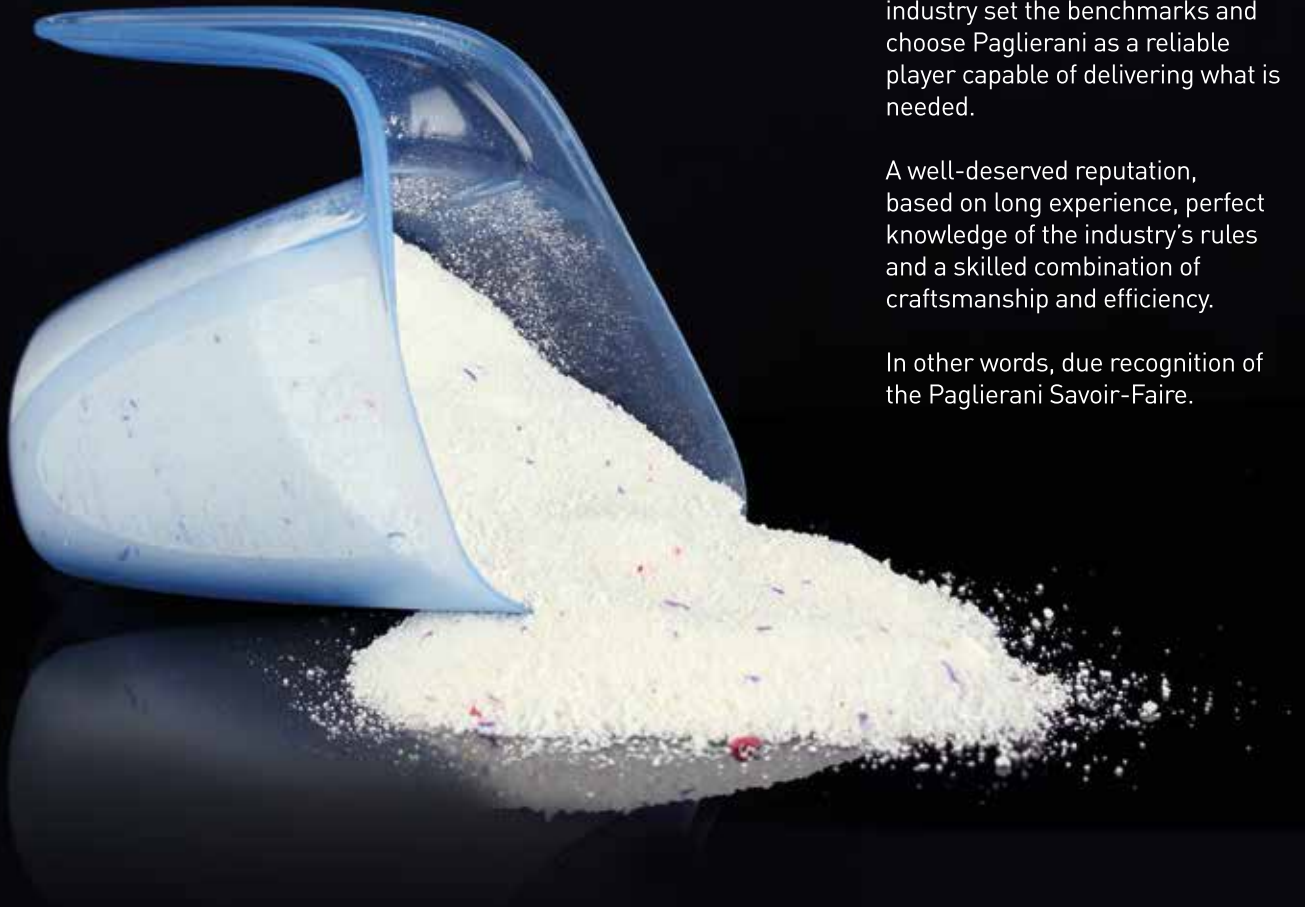

With Paglierani, pellet entrepreneurs gain access to a complete, specific range, the *Savoir-Faire* that comes from more than 10 years in the industry and outstanding quality of design and manufacturing, confirmed by countless references all over the world.

Weighing, bagging, (for valve, open-mouth and form-fill-seal bags or big bags), palletisation, and full pallet wrapping and hooding.

In short, Paglierani makes a major contribution to the success of forward-looking pellet industry businesses.

DETERGENTS

Amongst the crowning glories of the Paglierani range, its weighing and bagging lines for powder detergents, from 25 kg to Big Bags, are amongst the most popular.

The top multinationals in this industry set the benchmarks and choose Paglierani as a reliable player capable of delivering what is needed.

A well-deserved reputation, based on long experience, perfect knowledge of the industry's rules and a skilled combination of craftsmanship and efficiency.

In other words, due recognition of the Paglierani Savoir-Faire.

PAGLIERANI:
GENUINE
SATISFACTION,
WORLDWIDE.

FOR MORE THAN
90 YEARS.

THE WORLD
IS ON OUR
SIDE.

A push for growth, a search for specialized, market based solutions, increasingly avant-garde technological aides, and improvements in the production cycle have brought the company success in 32 nations on all five continents and have led it to an indisputable position as an international leader in the sector.

Almost a century of worldwide success.
