- All plastic scraps reused/resold

QUALITY

- Imported machinery and resins
- Full process and end control
- Audits and accreditations

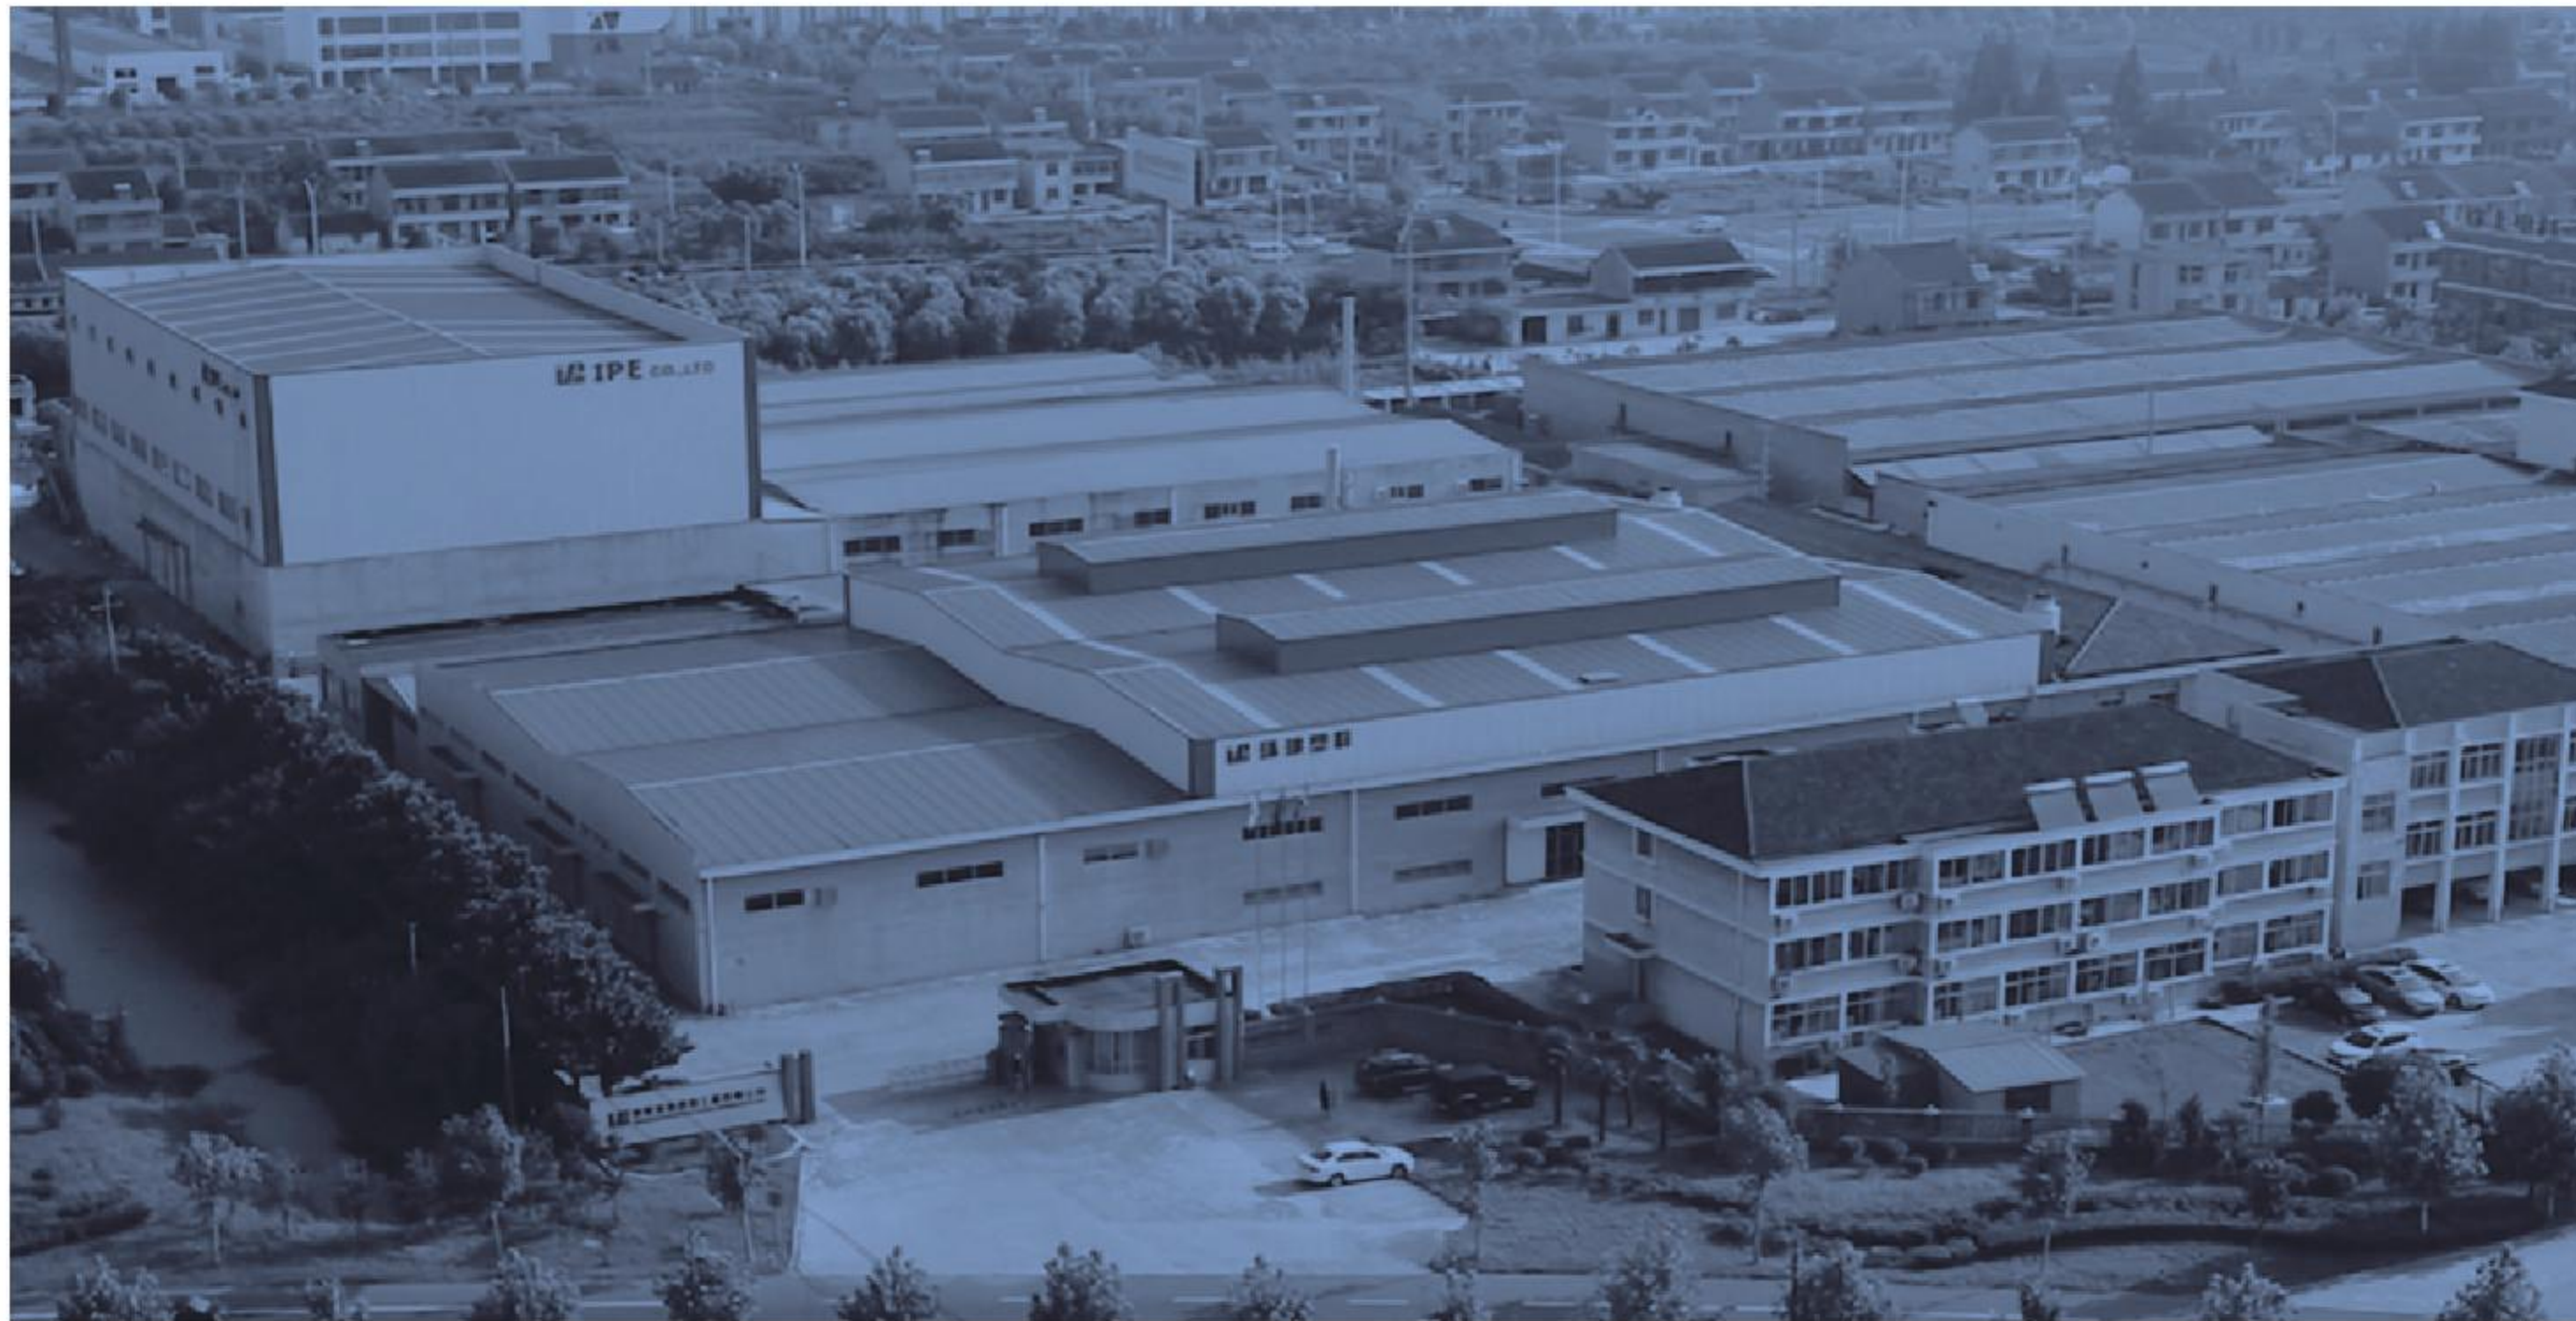

CONVENIENCE

- Complete range of barrier shrink packaging
- Full in-house printing & conversion

FOOD SAFETY &
COMPLIANCE

LEADING THROUGH INNOVATION

Established in 1998, International Plastic Engineering (IPE) became the first company in China to offer locally manufactured multilayer plastic casings. Later, we came China's first producer of barrier shrink bags, and subsequently Asia's first producer of shrink lidding films.

Throughout the years, IPE has grown and expanded our product range and now serve both domestic and international customers with quality barrier shrink packaging by utilizing latest European or North American production equipment, and combining it with local production costs.

FRESH MEAT HIGH SHRINK

Best fit for your product

AUSTLON -NB/ GD
SHRINK BAG

BONELESS MEAT • PROCESSED MEATS • CHEESE

FEATURES

- 01** High barrier and shrink, for shelf life extension to reduce food waste
