

*The Happy Makers*

# About Govind

At Govind, our motto is 'Happy Makers' and we take it very seriously.

The beginning of Govind Milk in 1995 was to fill the dire need of pasteurised milk & milk products in India. We, at Govind Milk, provided the much needed processing and marketing support to the distressed local farmers for the excess milk they produced.

With a humble beginning of 1000 liters per day we have reached to 10 million liters per day of milk collection. Every day we reach out to lakhs of households through our various brands such as Govind, Funzz, and Hills & Valleys. Our state-of-the-art manufacturing facilities, our extensive distribution network, the most hygienic and nutritionally superior dairy products we have a long standing base of happy customers.

Premium quality of milk is the base of all these products and we work closely with our farmer partners for that. We are preferred partner for many top of the line brands from food and nutrition sector.

# Our Plant

Our plant is situated at Phaltan area which is approx. 250 km from Mumbai, India. At Govind, the best procurement and processing systems are employed to process milk and produce milk products.

A fully integrated, state-of-the-art dairy processing unit at par with International standards, with the capacity to process in excess of 1 million liters of milk every day, is currently in use in Phaltan. The current production capacity is as follows:

- Powder: 30 MT per day
- Ghee: 30 MT per day
- Unsalted Butter: 30 MT per day

## Free-House Farming

Happy cows equals to healthy milk and free-house farming is a very important aspect in that process. We train all our farmers to use this concept for the cattle and promote it strongly. We grow natural grass organically. The cattle roam and graze freely here. Since they are not tied, they feel happy and fresh which results in the improved quality of milk.

# Our Products

## Skimmed Milk Powder (Spray Dried)

- Flavour & Taste - Pleasant & clean
- Protein – 34 % (on SNF basis)
