

CONTINUOUS FLOWPACK MACHINE

flowpack X

**THE MODULAR SOLUTION
FOR AIR-TIGHT FILM
PACKAGING AND PAPER
PACKAGING**

flowpack X

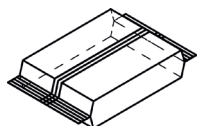

The flowpack machine flowpack X achieves one hundred percent air-tight film packaging seams, seamless traceability and reproducible results from the very first product packaging. Packaging under modified atmosphere is possible. Our packaging machine flowpack X packs goods in film or paper, by a simple changeover.

The flowpack X is available in two versions: with longitudinal sealing above or below. Both versions can be equipped on a modular and individual basis. Examples here are finger conveyor chains or infeed belts, thermal transfer printer, labelling machine and film roll changer for continuous film unwind, i.e. non-stop operation.

Our flowpack machines are also available as hygienically designed version.

HIGHLIGHTS

- Air-tight packaging seams thanks to continuous transversal sealing
- Optimum processing of the most diverse of film thickness and film types as well as coated paper
- Thanks to continuous transversal sealing, a long dwell time and high sealing pressure is achieved enabling the optimum processing of the most diverse coated papers
- Customised design of fin seal for excellent product packaging stability and appearance
- Siemens TIA Portal or Rockwell Automation control system; free remote service
- Smart user guidance via CoPilot and touch screen
- Maximum serviceability and maintainability thanks to perfect access and numerous maintenance-free components
- Easy line integration and connectivity with higher-level systems, Industry 4.0 Ready
- Optional monitoring, analysis and visualisation of machine and operating data via the Hugo Beck Cockpit

TECHNICAL DATA

Product infeed	manual as standalone/automatic in line
Film/Paper	e.g. PP, composite films, Tyvek®, coated paper
Product size	L: from 45 mm, W: 10 – 450 mm, H: max. 200 mm
Capacity	up to 12.000 cycles/h
Versions	longitudinal sealing above or below
