THE Ingredients FOR YOUR SUCCESS

FRUIT, STARCH and SUGAR – in these three segments AGRANA is successfully active around the world. Our extensive knowledge, market know-how and wide-ranging expertise is shared with our valuable partners. AGRANA not only refines agricultural raw materials to produce a range of industrial products, we also develop and realize together with our customers the most relevant and consumer focused creations.

OUR RAW MATERIALS ARE REFINED IN HARMONY WITH NATURE.

AGRANA is an international company headquartered in Austria, which is known for love of life, commitment to sustainable agriculture and caring for the world. These elements define who we are. Ultimately, they make their way into our business operations and ecological footprint. We promote the processing of pure, organic products and genetically unmodified resources. We rely on the use of low-emission technology and make use of nearly 100% of the agricultural raw materials processed to omit food waste.
