## Elite Company for Industry and Trade

a Syrian company on Egyptian soil, specialized in the manufacture of chocolate wrapping machines.  
Elite Company has stood-out in local and Arabian market since its foundation in the field of wrapping machines;  
which is characterized by constant development, efficiency and high production speed,  
meeting all Market requirements in terms of multiple shapes, sizes and excellence in chocolate fold  
wrapping

Which is convenient for all types of establishments and chocolate factories.

Elite Company is a fast-growing company that started its business as a company to develop  
Chocolate production lines, from which we acquired the experience in the requirements  
of the world of chocolate industry.

We have committed ourselves in Elite Company to continuously improve and manufacture machines  
that serve the confectionary industries in the Middle East and provide the best performance standards  
in order to ensure  
the confidence of customers in our machines.

The company was re-established in its modern form in the 6th of October Industrial City, to complete its  
journey of more than 50 years of design and development in the field of machinery and automation.  
Our services aren't limited to Egyptian market, but also extends to the middle-east and Europe through  
customer confidence in professional manufacturing

The company's first goal is to satisfy innovation and achieve customers' demand to obtain  
Advanced machines and production lines with high production capacities and efficiency  
The company is distinguished by its after-sales service through experience and highly qualified  
technicians

The highest quality, guarantee and delivery of spare parts and maintenance with a team working  
throughout the week.

## Our partners in success

## Distribute clients

Our customer base grew vast. Due to the high quality of our products, we have exported our products to Different countries including Jordan, Iraq, Saudi Arabia, UAE, Qatar, Bangladesh, South Africa and Spain. Our goal today is achieving the desire of customers in the field of wrapping and labeling across the world.

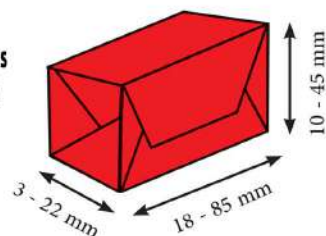

## RAV- 150

chocolate wrapping machine

### Technical Specifications

Speed, weight, and dimensions may vary by machine. These are the basic measurements. Adjustments can be done according to customers' needs. Each machine is labelled with a Fixed plaque specifying the machine in a clear manner that includes Technical information of the machine.

### Product Dimensions

### machine dimensions

Speed :	150 piece per minute
Weight :	850 kg
electrical supply:	220V (50-60Hz)
Consumption:	3 kW

## RAV- 150

chocolate wrapping machine

A new model of chocolate wrapping machine with many new features.

**RAV-150** Wraps any piece of chocolate at a high speed of up to 150 pieces per minute.

**RAV-150** machine can deal with all types of wrapping materials (aluminum foil, lined aluminum, metallized, and cellophane) with the possibility of centering (quotation) using a step motor and PLC.

## RAV- 150

chocolate wrapping machine

### change template:

The machine (RAV-150) is easy to use, and requires little experience to operate. Folding molds can be replaced with a time not exceeding 6 minutes using one key, no mechanical calibration is required.

### Add-ons:

- Extra paper device
- metallized paper welding device
- Color sensitive sensor for printed paper
- a link to connect with labelling machine
- Molds for multiple sizes
- Circular piece device

### Features:

we supply the RAV-150 with devices and accessories according to customer's request so as to develop the wrapping process and to accommodate the different types of chocolate wrapping styles.

## RAV- 150

chocolate wrapping machine

### mechanism:

All mechanical connections in the RAV-150 are driven by a single axle, which results in an attenuated noise, smooth movement and increased speed.

RAV-150 is the only machine in the world that works through one axis.

## RAV- 150

chocolate wrapping machine

### Machine features:

Control panel with a 10-inch touch display, user-friendly interface, up to 12 storage memory for different shapes and paper dimensions, a daily product counter, as well as the ability to Switch between Arabic and English for the user interface.

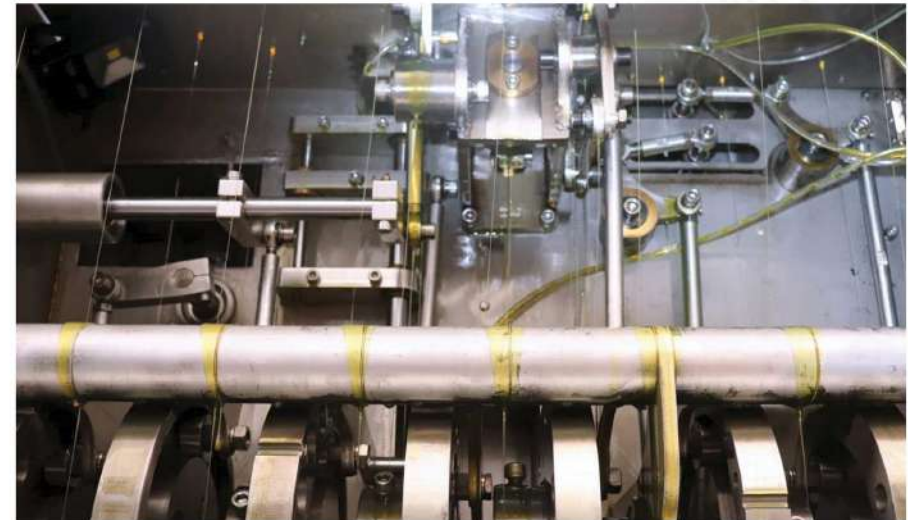

- **RAV-150** machine contains several safety systems.
- **RAV-150** machine size is small, suitable for all types of facilities and factories.
- **RAV-150** machine chassis and all parts in contact with chocolate are made of Food safe chromium 304.

## RAV- 150

chocolate wrapping machine

**RAV-150** is lubricated through an oil bath that reaches all the moving parts of the machine, giving smoothness and longer life for all parts of the machine

The **RAV-150** is certified Accredited and verified by the Ministry of Industry to match global standard specifications.

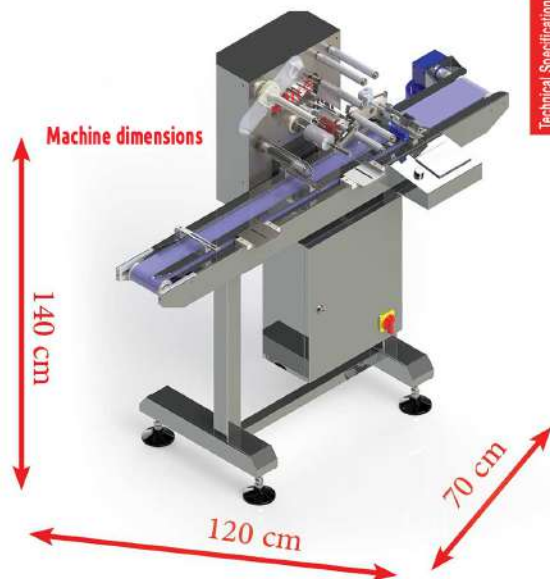

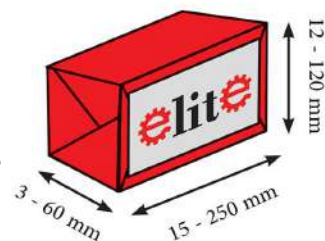

## TECK-F240

Flat labelling machine <<Chocolate>>

### Technical Specifications

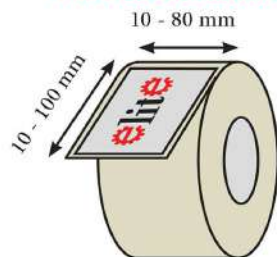

Speed, weight and dimensions may vary from one machine to another. These are the basic measurements. Adjustments can be done according to customers' needs. Each machine is labelled with a Fixed plaque specifying the machine in a clear manner that includes Technical information of the machine.

### Min\Max Dimensions of product.

Technical Specifications	⌚ Speed :	240 pieces per minute
	⚖ Weight :	95 kg
	⚡ electrical supply:	220V (50-60Hz)
	⚡ Consumption:	1.5 kW

### Min\Max Dimensions of label.

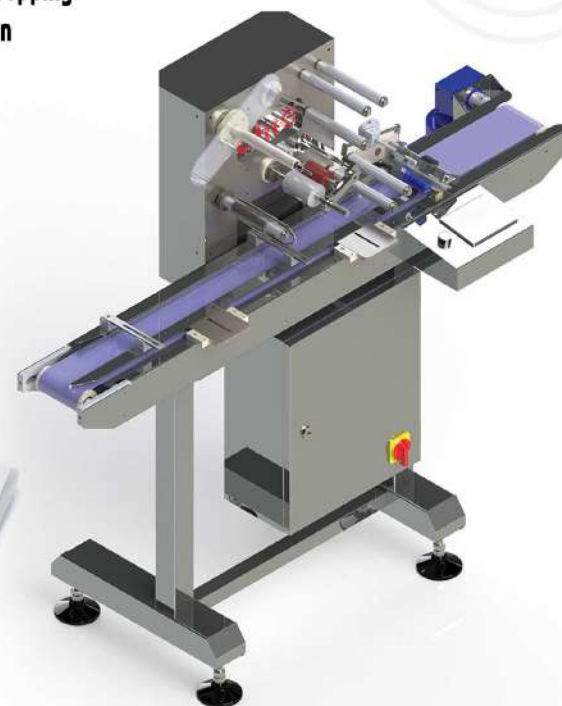

## TECK-F240

Flat labelling machine <<Chocolate>>

**TECK-F240** is a high-speed labelling machine, Made of chromium and can label all types of products (Chocolate, boxes, boxes, jars).

**TECK-F240** is also available in Multiple sizes and can be linked to a wrapping machine for optimal production speed.

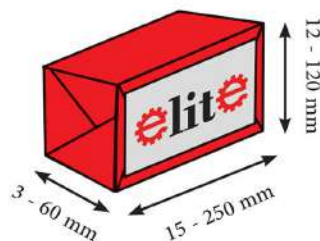

## TECK-B240

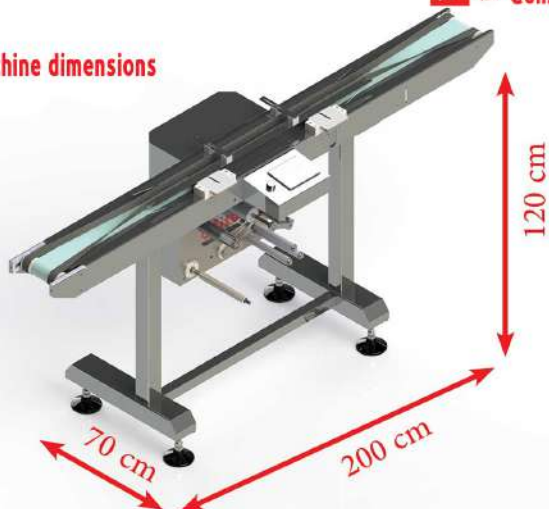

Reverse Labeling Machine <<Chocolate>>

### Product Dimensions

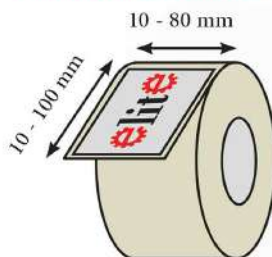

Technical Specifications	⌚ Speed :	240 pieces per minute
	⚖ Weight :	95 kg
	⚡ electrical supply:	220V (50-60Hz)
	⚡ Consumption:	1.5 kW

### Machine dimensions

### Min\Max Dimensions of label

## TECK-B240

Reverse Labeling Machine <<Chocolate>>

**TECK-B240** was developed to label Products with special shapes. The machine is designed to label Round, geometric, oval and elliptical shapes

## TECK-B80

### Band labeling machine

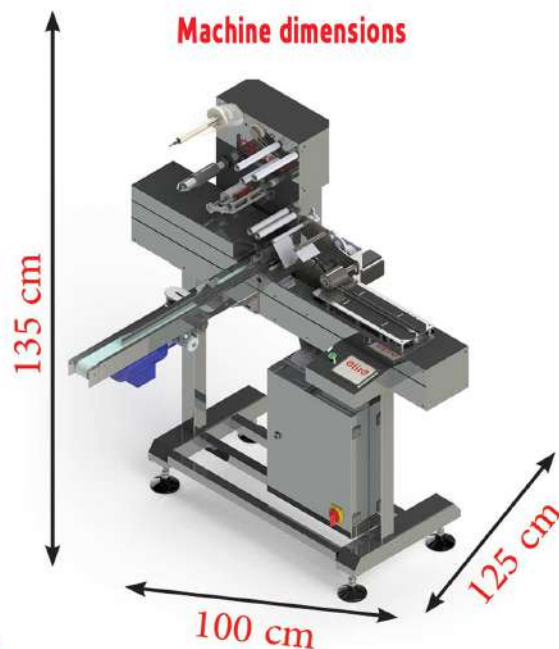

Min\Max Dimensions of the product.

Technical Specifications

- Speed : 60-80 pieces per minute
- Weight : 95 kg
- electrical supply: 220V (50-60Hz)
- Consumption: 1.5 kW

### Machine dimensions

## TECK-B80

### Band labeling machine

The band labeling machine is a machine that has special specifications in the company elite. Using advanced technologies **TECK-B80** can wrap a label around chocolate pieces at a high speed of up to 80 pieces per minute. The operation of this machine requires a pneumatic system.

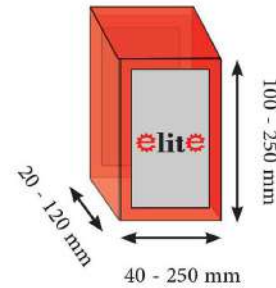

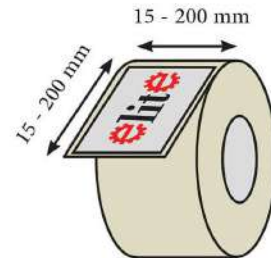

## TECK-DF80

Double-Sided Labeling Machine <<Package>>

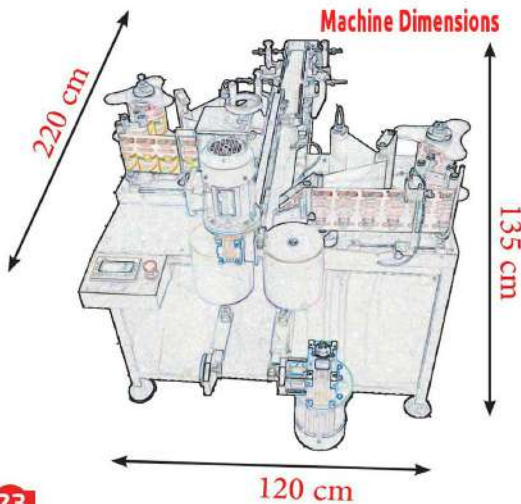

### Min\Max Product dimensions

### Min\Max label dimensions

Technical Specifications	Speed :	60-100 packages per minute
	Weight :	165 kg
	electrical supply:	220V (50-60Hz)
	Consumption:	1.7 kW

## TECK-DF80

Double-Sided Labeling Machine <<Package>>

Labelling packages is no longer difficult with **TECK-PF80**  
This machine can label any package, box, bottles or any product  
that needs double-sided labelling.  
it provides high speed as a result of labeling two surfaces simultaneously.

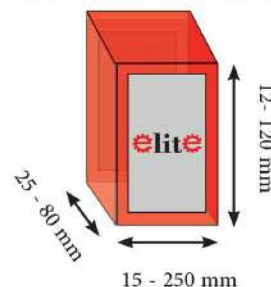

## TECK-F80

### Side labelling machine

Technical Specifications	Speed :	80-120 packs per minute
	Weight :	95 kg
	electrical supply:	220V (50-60Hz)
	Consumption:	1.5 kW

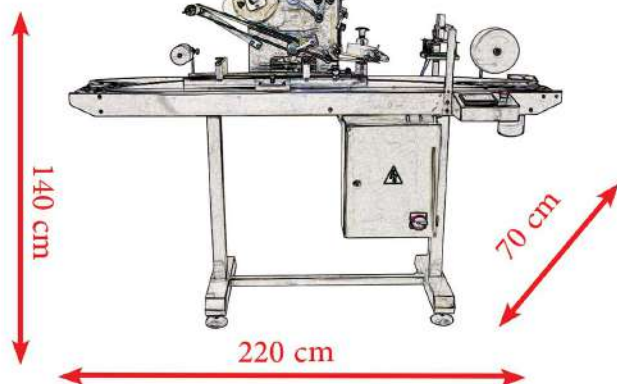

#### Min\Max Product dimensions

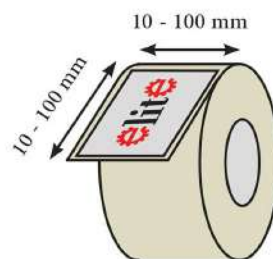

### Technical Specifications

Speed, weight and dimensions may vary from one machine to another. These are the basic measurements. Adjustments can be done according to customers' needs. Each machine is labelled with a Fixed plaque specifying the machine in a clear manner that includes Technical information of the machine. The operation of this machine requires the presence of (pneumatic system).

#### Machine dimensions

#### Min\Max Dimensions of label

## TECK-F80

### Side labelling machine

**TECK-F80** machine can label any package, box, bottle or any product that needs to be labelled on one side it provides high speed labeling due to its dynamic mechanisms.

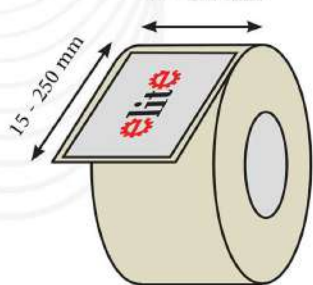

## TECK-R160

Round labelling Machine (Circular)

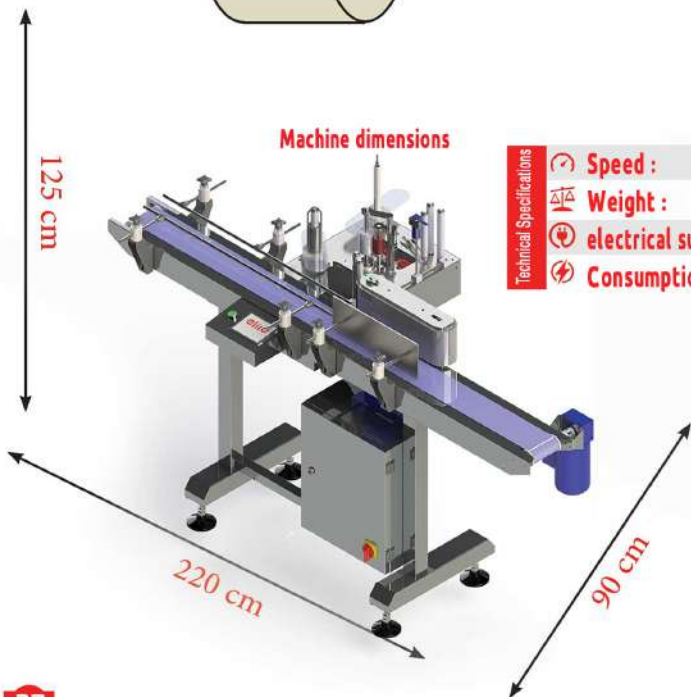

Min\Max Product dimensions

Min\Max Dimensions of label

15 - 150 mm

Machine dimensions

Technical Specifications	⌚ Speed :	160 packs per minute
	⚖ Weight :	165 kg
	⚡ electrical supply:	220V (50-60Hz)
	⚡ Consumption:	1.7 kW

## TECK-R160

Round labelling Machine (Circular)

labeling round packages by hand can be difficult and slow.

**TECK-R160** can label up to **160** Circular jars, flasks... per minute.

## Thanks to customers

**Elite Company for Industry and Trade would like to extend its sincere thanks and appreciation To all clients and allies who had cooperated with and gave the company the opportunity to offer them our services and a special thanks to the companies and institutions**

**Which supported us by purchasing our products and we hope that Elite Company for Industry and Trade has presented You with machines that meet your needs in developing production lines.**

**We hope for success and continuity for both of us**

**With warmest regards**
