Productive and storage processes

Since 2020 we have been adapting, implementing, and optimizing our Management System in accordance with the requirements of the ISO 9001:2015 Standard, under the spirit of continuous improvement.

We have extended this certification to the following areas: Marketing of pulses, cereals, and oilseeds (specialties) in the domestic and foreign markets; Management of the reception, storage and dispatch of finished products at the Agrofin Agrocommodities SA plant; and Management of the reception, classification, sorting and bagging of pulses, cereals and oilseeds (specialties) in the domestic and foreign markets, bagging of legumes, cereals and oilseeds (specialties) in third party plants.

We are currently working to obtain HACCP certification in our warehouse and later in our plant. All storage and consolidation operations are centralized at our plant in General Lagos, Santa Fe. Our staff is responsible for controlling the quality and proper storage of the products. At the same time, we have external audits that control the product from reception at the warehouse to final export.
