OUR IMPACT

IMPACT
1

**BIODEGRADABLE
PACKAGING**

**Our Biggest Step
Towards Sustainability**

Our new 99% biodegradable, US FDA-Certified bottles & caps take a maximum of 5 years to biodegrade. As they breakdown, they convert to "humus" - organic material - and turn into soil, leaving no micro-plastics behind. We are proud to contribute to the UAE's sustainability initiative for a better world.

Together, let's make a real difference.

IMPACT
2

**WASTE MANAGEMENT
AND COMPOST FACILITY
SOLUTIONS**

To the Soil

We are implementing waste management, Tadweer and compost facility solutions for the fruit peel and pulp waste after juicing, promoting responsible waste disposal, and giving back to the soil.

IMPACT
3

**CONVERSION OF
MANUFACTURED
BY-PRODUCTS INTO
ANIMAL FEED**

Nurturing Nature

Nutrient-Rich Recycling:

Partnering with local manufacturers to upcycle solid by-products from the fresh manufacturing process into nutritious animal feed.

Waste Water Recycling:

Our waste water is recycled into pure water which is used for cooling our chiller units for irrigation purpose.
