The banner has a teal background with a stylized cityscape illustration at the bottom, including the Berlin TV Tower and various buildings. Teclast tablets are shown displaying colorful abstract art. The text is white and orange, providing clear information about the booth location and event details.

Teclast is set to launch a premium line of tablets named the Art Series. These devices will feature top-tier displays boasting 500 nits brightness, over 2.5K resolution, and 90% DCI-P3 wide color gamut. Concurrently, the Art Series will see iterative upgrades to its CPUs, delivering more powerful yet energy-efficient performance.

The combination of exceptional screens and robust CPUs ensures that Art Series tablets deliver an extraordinary user experience across diverse scenarios—whether for professional drawing, office productivity, cinematic viewing, or immersive gaming.

Simultaneously, the Art Series debuts ArtOS, an operating system developed by Teclast based on Android 15. Its more aesthetically pleasing UI, combined with the Art Series-standard Smart Button for one-tap app access, enhances usability. Teclast's proprietary Art Space scenario mode further enriches the series' versatility.

# Embracing Digital Aesthetics

The Art Series tablets feature self-developed ArtOS, with artistic UI design for immersive digital aesthetics, integrated ArtSpace scenarios empower seamless creativity.

Notably, the Art Series introduces the AI Hyper Audio cavity system. Comprising four large 9cc audio cavities and paired with Teclast's self-developed algorithm, it delivers a truly immersive audiovisual experience. The Art Series invites you to embrace the fusion of technology and aesthetics.

This year, Teclast has launched a number of compelling tablets, such as:

**ArtPad Pro:** As the debut model of Teclast's all-new Art Series, the ArtPad Pro delivers a comprehensively upgraded user experience. It features a high-definition screen with 3.48 million pixels, coupled with an optimal aspect ratio and 4,096 levels of pressure sensitivity, designed to deliver stunning visual immersion and an authentic drawing/writing experience.

**Teclast T70:** A powerhouse designed for immersive viewing and sustained performance, featuring a 14-inch HD display, Helio G99 octa-core processor, and a massive 10,000 mAh battery.

**Teclast T65 Plus:** Combining visual smoothness with efficient multitasking, the T65 Plus boasts a 13.4-inch HD screen with a 120Hz refresh rate, also powered by the Helio G99 processor and a 10,000 mAh battery.

# Fast. Big. Smooth.

120Hz Max View | Helio G99 CPU | 13.4-inch Display

T65 Plus 13.4"

Through these launches, Teclast demonstrates not only its technical capabilities but also its vision to blend functionality and creativity. GITEX attendees are invited to explore the booth for hands-on experiences and a closer look at how Teclast continues to redefine mobile computing.
