

turboSMTP WordPress Plugin

**Deliver and track all your
WordPress emails in real
time**

turboSMTP's official plugin for WordPress ensures your transactional emails are delivered reliably and tracked in real time. Improve email deliverability from your WordPress site with a tool designed for ease and efficiency.

Setup is simple: just enter your sender credentials and you're ready to go.

- ✓ Activate the plugin and it automatically becomes your default email sender.
- ✓ Send all transactional emails reliably, including WooCommerce and system notifications.
- ✓ Track performance with real-time reports: opens, clicks, bounces.
- ✓ Test email delivery anytime with the built-in feature.
- ✓ Enjoy fast and secure delivery through whitelisted servers.

Keep your WordPress emails professional, reliable, and fully tracked.

No technical skills or advanced configuration required.

Why Choose turboSMTP for WordPress.

Improve your email deliverability and streamline your WordPress communications. turboSMTP handles all your transactional emails automatically, giving you full control and real-time insights.

Once activated, it handles all outgoing emails via the `wp_mail()` function, including subscription confirmations, system notifications, WooCommerce emails, and security alerts.

- ▶ **Reliable Delivery**
Ensure your emails reach the inbox, every time.
- ▶ **Easy Setup**
No technical skills required: start sending in minutes.
- ▶ **Real-Time Reports**
Track opens, clicks, bounces, and more.
- ▶ **Full Compatibility**
Works with WooCommerce, system notifications, and security alerts.
- ▶ **Test Email Feature**
Check service status anytime.
- ▶ **Whitelisted Servers**
Fast and successful email delivery guaranteed.

**Easily integrate turboSMTP with
WordPress and ensure every email
reaches the right inbox.**
