

turboSMTP + Zapier

Send and track emails directly from all your apps

turboSMTP now integrates with Zapier, allowing you to connect your email sending to hundreds of apps with just a few clicks.

You can reliably send transactional and automated emails, track delivery, opens, clicks, and bounces, and trigger follow-ups automatically.

All without manual effort or technical skills.

- ✓ Clean bounced addresses automatically.
- ✓ Sync your data across all tools.
- ✓ Ensure emails reach the right person, right time.

Let your apps work together with turboSMTP and Zapier, and streamline every email you send.

How It Works

The possibilities with turboSMTP and Zapier are virtually endless.

You can:

-  Send emails automatically from any connected app.
-  Track delivery, opens, clicks, and bounces in real time.
-  Trigger follow-ups or other actions based on email events.
-  Keep your contacts, data, and campaigns up to date automatically.

**Connect turboSMTP and Zapier today and
take full control of your email sending.**
