

FatherShops

FatherShops to Showcase AI Store Builder, Automation, and E-Commerce Innovation at GITEX Global 2025

Dubai, UAE – FatherShops, a global leader in e-commerce solutions, will exhibit at GITEX Global 2025, where it will spotlight its latest innovations designed to help entrepreneurs, social sellers, and enterprises launch and scale their digital businesses with ease.

At GITEX 2025, FatherShops will feature five core platforms shaping the future of online commerce:

FatherShops to Showcase Cutting-Edge E-Commerce Solutions at GITEX Global 2025

By combining innovation, automation, and global reach, FatherShops is making it easier than ever for entrepreneurs to launch and scale their online businesses, empowering them to turn ideas into thriving ventures from day one.

What We Do

AI Store Builder

FatherShops will unveil its AI Store Builder, a next-generation platform that makes launching an online business faster and smarter.

It will combine intelligent design assistance with a drag-and-drop Theme Builder, allowing entrepreneurs to personalize layouts, colors, and branding without technical skills.

Built-in AI tools will generate images, SEO-friendly meta tags, blog content, and product descriptions – helping stores attract and convert customers from the very beginning.

Fully integrated with FatherPay Dropship, FatherStock, FatherSchool, and WorkFlows, each store will be more than a storefront – it will be a complete business ready to scale.

•• FatherPay Dropship

•• FatherShops will also present FatherPay Dropship, its integrated payment gateway created specifically for dropshippers and small businesses.

Unlike traditional gateways, FatherPay Dropship will allow sellers to accept online payments without requiring a trade license.

This breakthrough will remove one of the biggest barriers for new entrepreneurs, enabling them to start selling immediately with secure, compliant global payment processing.

FatherStock

With FatherStock, FatherShops will showcase how businesses can access millions of global products with a single click.

More than a sourcing tool, FatherStock will manage the entire supply chain – from product imports and order fulfillment to branded packaging, quality checks, and logistics.

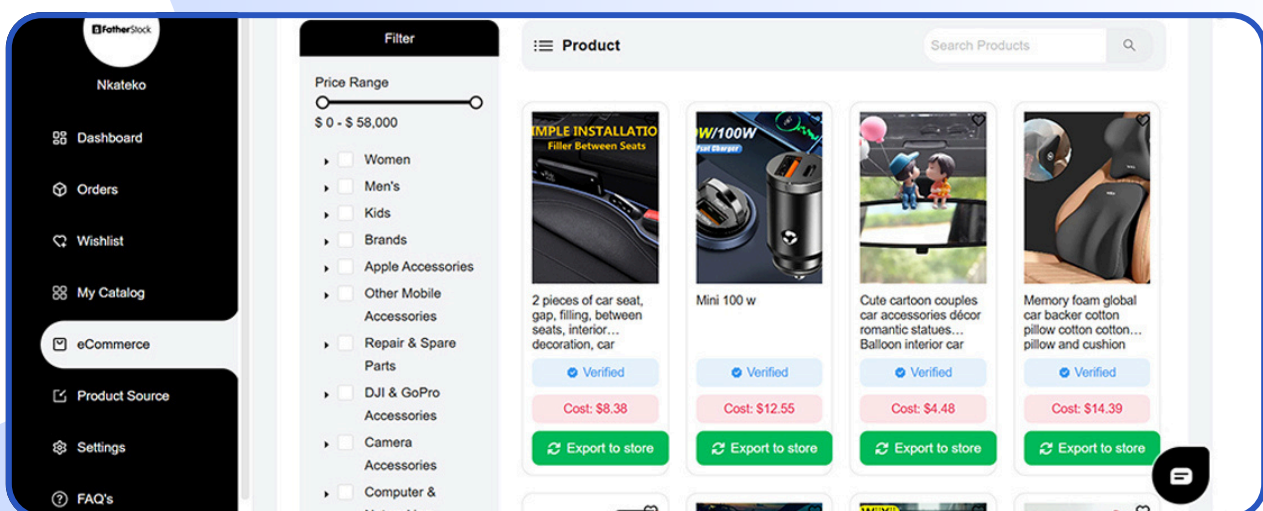

For larger enterprises, FatherStock will also provide white-label solutions, offering scalable fulfillment options without the need for heavy infrastructure investments.

FatherSchool

Education will be another focus with FatherSchool, FatherShops' learning platform designed to guide entrepreneurs at every stage of their journey.

Through step-by-step courses, expert-led lessons, and actionable resources,

FatherSchool will equip sellers with practical knowledge to set up, manage, and grow successful online businesses in the global market.

WorkFlows

Finally, FatherShops will introduce WorkFlows, its automation platform that streamlines day-to-day operations.

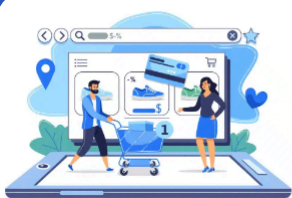

WorkFlows will handle repetitive tasks such as order management, customer engagement, and inventory updates, enabling sellers to save time, reduce errors, and focus on scaling their businesses.

Empowering the Next Generation of Entrepreneurs

“Our vision is to remove the barriers that hold entrepreneurs back by combining AI, automation, payments, and fulfillment in one ecosystem. GITEX Global 2025 will be the stage where we demonstrate how FatherShops is enabling smarter, faster, and more scalable e-commerce for the world,”

- Matar Al Dossari, CEO of FatherShops.
