

Aeda Wallet Opens to Visionary Partners and Investors to Redefine Global Money Movement

[Aeda Wallet](#), an EU-licensed fintech startup, announced today that it is opening discussions with visionary partners and early investors to co-build the next-generation global fintech platform. Aeda is preparing a non-custodial digital wallet, designed to make cross-border money movement as simple, fast, and affordable as sending a text — powered by blockchain and stablecoin rails.

Today, cross-border transfers — especially from Europe and the US to Eastern Europe, Central Asia, MENA, and Africa — remain slow, fragmented, and expensive. Migrants, freelancers, and remote workers lose an average of \$13 on every \$200 transfer due to high fees and delays. Aeda Wallet solves this by combining blockchain efficiency with a simple, banking-like user experience, removing crypto jargon and hurdles. Being non-custodial, users always remain in full control of their money and private keys.

“With Aeda, users get the simplicity of a regular banking app — search by name, tap, and send — while the power of Web3 works seamlessly in the background,” said [Artur Kartshikyan](#), Founder and CEO of Aeda Wallet. “No crypto jargon, no hurdles — just instant, low-cost, borderless money movement available 24/7, even for people without a bank account.”

With its MVP under development and early testing, Aeda Wallet will allow users to:

- Send and receive money across borders instantly and at near-zero cost
- Spend balances directly with wallet-linked cards, online or in-store
- Access financial services anytime, anywhere — borderless, 24/7, without needing a bank account
- Retain full ownership of funds through a non-custodial model that puts users, not intermediaries, in control

Looking ahead, Aeda’s vision is to expand into MENA and Africa corridors and become the next-generation global fintech — merging traditional finance, Web3, and AI into an intelligent, agentic payment ecosystem.

Aeda Wallet is an EU-licensed fintech startup preparing a non-custodial digital wallet for instant, low-cost cross-border transfers, payments, and card issuing on blockchain. The founding team brings over a decade of experience in banking, fintech, and digital transformation, with a proven track record of building mobile apps, payment systems, and digital platforms. Aeda’s mission is to make financial services affordable and accessible to everyone while ensuring users retain full control of their money. The company is currently welcoming visionary partners and investors to join its journey.
