

CAMOCO FOODS BY BELGOSUC

offers you a diverse range of fruit concentrates derived from red and citrus fruits.

Our raw materials come from one of the best areas in the world for fruit production: **the Levante** (name used to refer to the eastern region of Spain) **and Andalusia**.

Our excellent location, very close to the harvesting areas, allows us to work with products that keep all the nutritional and organoleptic properties of the fruits intact.

See the following pages and find the best option for your needs.

Do you want more details about our products or do you have any specific questions about fruit concentrates? Please do not hesitate to contact us. Our specialised experts will help you.

FRUIT JUICE & PUREE CONCENTRATES

Fruit Juice Concentrates are obtained by removing the water content of the juice, through evaporation, thus offering advantages for storing and preservation.

Fruit Purees refer to mashed fruits from which the skin and stone or seed have been removed, retaining their initial taste and mouthfeel. Ideal for the production of juices, nectars and smoothies.

IQF (Individual Quick Freezing)

IQF technology involves freezing each piece of fruit from the inside out, thus preserving its shape and all its qualities. It is important to highlight that the freezing processes do not affect the nutritional quality of the food.

Thus, frozen berries provide the same nutritional value as fresh berries, with the advantage that they retain it for a longer period of time, as it is a long-life product. Unlike fresh fruit that ripens very quickly, IQF fruits offer the same appearance, degree of ripeness and taste all year round.

CITRUS

Lemon

NFC JUICES & CONCENTRATES

Juices are obtained through mechanical cold squeezing processes.

Our Concentrates, derived from the evaporation process of citrus juices, can reach up to 500 GPL in lemon, adjusting the pulp between 0 % and 10 %.

230L Metal drum, 220L Aseptic metal drum, 10L Pail, Isotermic tanker road, 10 to 1000L Bag in box

CELLS

Pulps are obtained by a physical separation or centrifugation of the juice.

230L Metal drum with open mouth, 220L Aseptic metal drum, 10L Pail

ESSENTIAL OILS & DERIVATIVES

Essential Oils are obtained by cold pressing the peel of citrus fruits. This mechanical process is carried out without any heat treatment, preserving all the properties, benefits and enhancing the fragrances of the oil.

We can also offer terpenes and water-based or oil-based distillates. These products are obtained through sub-processes derived from the cold extraction of lemon oil.

From 25 to 220L Metal drum with two mouths with epoxy coating

CLOUDIES & CLARIFIEDS

Rich in beta carotenes, pectins, fibre, flavonoids and a high cloudy power. The products are natural and without additives.

230L Metal drum with open mouth, 220L Aseptic metal drum

FRUIT RINDS

Our wet or dehydrated citrus peel is a natural product obtained from ripe, healthy fruits.

The product is packed and frozen immediately to ensure its preservation without the addition of any additives.

230L Metal drum with open mouth, 10 to 20L Pail, 10L Bag in box

APPLICATION

Juices, fruit-based drinks, flavored drinks, ice cream, sauces and dressings

Compound fruit juices for the beverage industry

Fragrances and flavors, perfumery, chemistry and beverages

Fruit juices, flavoured drinks, soft drinks, ice-cream, bakery and jams

Infusions, confectionery (candied peel, lemon peel, etc.), sauces, cosmetics (gels, shampoos)
