

## Organic farming

Aperitivos de Añavieja is a family-run business with over 25 years of experience in the sector. We are pioneers in producing organic crisps and have a clear commitment to organic farming with our 200-hectare farm since 1998. The production of healthy and natural food is what drives us to produce sustainably.

## Raw material and process quality and control

We manage the entire process from seed to final product and select the best raw materials at source, which allows us to offer snacks of the highest quality to our customers.

We are certified in IFS, the international food safety standard.

We have an R&D+i team to develop new products, and we strive to reduce the fat content and offer healthier snacks.

## Circular economy

Our company follows the principles of circular economy and respect for the environment, and we try to reduce the waste generated to zero. Plastic and cardboard are recycled, oil is reused to make biodiesel, and organic waste is composted in our plant and used as fertiliser in our fields. We have a self-consumption solar plant to obtain clean energy, reducing our CO2 emissions to a minimum.

“Pure organic  
and sustainable  
essence.”
