ABOUT US

YIOTIS S.A. manages a significant portfolio, which includes a wide range of food products. Innovation has always been an integral part of YIOTIS's S.A. culture. Looking back at the 1930's, YIOTIS's company was the first to introduce standard infant formulas and baby foods to the Greek market. The following years, the company expanded its existing product portfolio with new, innovative products. The goal of YIOTIS's S.A. has always been to identify and follow new trends and innovative ideas, with focus on products with high nutritional value that meet the diverse consumer needs.

One of many YIOTIS accomplishments is the development of Sweet & Balance range of products, the first complete line of health-oriented desserts with low GI, suitable for diabetic people. Sweet & Balance series has been assessed through clinical studies, in order to guarantee that the products are both safe and effective.

VISION

Our vision is to produce innovative products of high nutritional value and assured quality which will satisfy the nutritional needs and indulgence of the entire family in the modern age.

EXPORTS

Owing to its high-quality products and unique taste and texture, YIOTIS S.A. has formed relations of trust with consumers in both Greek and foreign markets and has developed a network of partners that operates in more than 25 countries across the five continents. In accordance with the company's vision, export performance is rising each year, allowing to access more consumers and partners, and to diversify market opportunities.

QUALITY CONTROL & RESEARCH

QUALITY CONTROL & RESEARCH

Quality control, food safety, research and development are important elements of YIOTIS S.A. mission. All required procedures and activities are certified by accredited certification bodies. In the context of an integrated compliance system the relative provisions and all existing in force legislation are applied.

HELLENIC RESEARCH AND INNOVATION CENTER

YIOTIS' s competitive advantage, in terms of research, is the Hellenic Research & Innovation Centre, (<http://hric.gr>), which came about when transforming its chemical and microbiological laboratories into an independent body, a process that was completed in early 2017. HRIC was set up to meet the modern needs of the industrial and business sectors. Its key values are to ensure the quality of services provided and to develop innovative actions in the field of applied research. It promotes collaboration between industry and scientific bodies in order to increase the competitiveness of Greek products. It specializes in human nutrition, food technology and safety, quality control and in the research, as well as in the development and marketing of food products. In addition, one part of HRIC is the Institute of Nutrition and Health which is an innovator in Food Science, developing foods that support consumer health, meet industry needs and promote a healthy lifestyle based on the latest scientific data.

INFANT FORMULAS & CEREAL BASED BABY FOODS

YIOTIS S.A. has built up an excellent reputation in the field of infant nutrition over the years. The company uses the most up-to-date logistics and infrastructure, places great emphasis on scientific research and invests in its team of scientists who carry out inspections in a regular basis.

YIOTIS cereal-based baby foods for infants and young children are produced in Greece with high-quality raw materials. They are enriched with Ca and vitamins B1 & D, as required by existing legislation, and are free of colorings and preservatives. The company operates with a sense of responsibility, respecting the needs of individuals, the society, and the environment, contributing to the reduction of ecological footprint. For further information please visit: www.yotis.gr/foodprint

Infant formulas are designed to meet the requirements of special nutrition needed by babies from birth. Contains DHA (as required by existing legislation for all infant formulas), an omega-3 fatty acid.

SUGAR FREE
DESSERTS

Sweet & Balance

with sweetener of natural
origin from the plant

stevia

The Sweet & Balance range offers a big variety of delicious sweets, beverages and desserts, without sugar. All products contain sweeteners of natural origin from the stevia plant, so that anyone can have everyday their own...pure indulgence! Sweet & Balance products, besides their delicious flavor, stand out for their high quality and scientific background. A series of clinical studies in collaboration with reputable hospitals and universities have been conducted in Greece and abroad. In addition, the benefits of product consumption by both adults and children, the impact on key indicators such as the glycemic index while providing with valuable data for designing new products, are acknowledged.
