SO, IF YOU ARE THINKING OF PURE NATURAL HONEY, IT IS AA FOOD FACTORY, Our Goal remains to make our name and products recognizable among the prominent names of the world for purity and honesty.

A JOURNEY OF COGNIZANCE

Our motto: To make what we can feed to own family.

As dedicated consumers of honey ourselves, we were always sceptical about buying pure honey as good as that made by mother nature and its workers (bees). After a lot of contemplation, we were motivated to get to the core of this process and make a difference in this industry, hence we come forth as 'GARDENS HONEY'. As habitual consumer of honey ourselves, we know what people expect when it comes to honey, so we are completely dedicated to address every single need of the consumer putting ourselves in their place.

Our mission is to connect mother nature to fellow human beings through its products in every household. The only thing in mind while building up Gardens Honey (A PRODUCT OF AA FOOD FACTORY) was to establish it as the "House of Purity". Our honey is 100% pure, just as mother nature intended.

Our promise: To process the product of nature - 'Honey with love' so as to keep the natural properties intact, to sell with honesty, and offer the best value to our fellow human beings. We started with a simple idea - honey is better with the same qualities as that of honey straight out of the hive. So, our honey is 100% pure raw, unfiltered and unpasteurized which means that it contains all-natural goodness such as enzymes, amino acids, and pollen to make it a true healthy honey.

Bees make honey and it's that unadulterated honey we want. We ensure this through rigorous testing for antibiotics, pesticides, herbicides and rice or corn syrup adulteration. The entire testing is done through world's most renowned third-party labs and our in-house lab to ensure quality and consistency.

The honey we get is straight from the hive. So naturally, there are some bee parts and chunks of pollen and wax floating around. So, we strain it. Straining, not filtering, allows all the good elements through, but keeps the wax and bee parts out. We respect the efforts of the bees to make this wonderful product with the help of mother nature. While processing, we always make sure that we do not destroy the benefits of honey with minimum heating and keeping it the way the bees made it.

Gardens Honey is one of the best raw honey suppliers for natural and pure honey based in India.

OUR PRODUCTS

We are successfully extending our service to Honey and other Bee Products (Honey Comb, Beeswax, Pollen, Honey Infusion, Honey with Nuts and Beeswax Candles) all around the world. We source and process the best of honey and bee products, also offering the best of varieties including Mustard, Sidr, Lychee, Acacia, Eucalyptus, Multi-Flora, Wild-forest, Kashmir and Organic honey at a great value to all our consumers.

HONEY

"Honey is a popular traditional home remedy for a considerable number of diseases. The most popular one being for annoyingly common cold infections! This is because Honey contains antioxidant, antibacterial, and antimicrobial properties that fight against the virus, bacteria, and fungus to treat the cold and its underlying symptoms."

HONEY COMB

Honey Comb is a structure of hexagonal shaped cells composed of beeswax and containing the purest form of Honey and pollen. Raw Honeycomb is eaten as well as used for its beauty benefits as it has antibacterial and antioxidant properties.

BEEWAX

Beeswax is a natural substance made by the worker bees that is extracted from the honeycomb. This incredible ingredient is widely used in making cosmetics, candles and is used as a lubricating, glazing & polishing agent. Medicinally, it is used to lower cholesterol, has anti-inflammatory and pain-relieving effects.

POLLEN

Bee pollen has anti-bacterial, anti-fungal and anti-viral properties and it is rich in vitamins, minerals, proteins, lipids and fatty acids, enzymes, carotenoids and bioflavonoids. Contains antioxidants, it is known to remove toxins. It is also anti-inflammatory and it is a natural remedy for allergies and other ailments.

HONEY INFUSION

Combining the goodness of Herbs and Honey!

This unique Honey Infusion combines the benefits of our organic herbs with honey. These jars of herb and honey concoctions are both delicious and healing.

Using Honey as a medium for delivering the flavours of herbal medicine is an old and favoured form of administering the healing home remedies. We use only organic herbs along with raw unfiltered and unpasteurized honey which contains all the naturally occurring vitamins and enzymes.

BEEWAX CANDLES

Beeswax is a natural, renewable resource. Beeswax candles emit a bright, healthful light within the same spectrum as the sun - plus negative ions that clean the air and invigorate the body. Beeswax burns longer, drips less, and smells wonderful, naturally.

HONEY WITH NUTS

This yummy on-the-go snack combines the goodness of nuts and honey! These Nuts in Honey can be stirred into oatmeal, swirled into yogurt, poured onto pancakes, draped over grilled fruit, spooned over ice cream, or even eaten straight from the jar. A great gifting idea; a healthy and a simple snack for your kid that tastes great too.

BRIEF PROCESS DESCRIPTION

Liquification
Pre-Heating and Straining
Vacuum Evaporation
Homogenization in 20 MT tank
Cooling of Honey
Filtration of Honey
Drum Filling and Locking
Marking and Storage
Sealing and Dispatch
