Taros

cutting edge in palletising

- ✓ very cost effective
- ✓ groundbreaking design
- ✓ compact footprint
- ✓ IIoT-enabled
- ✓ controls of the future
- ✓ long lasting reliability

Taros.

Taros is a high level layer palletiser that has been designed to palletise at the highest operating standards and lowest maintenance costs available today. The Taros palletiser has a capacity range that makes it suitable for both end-of-line as centralised multi-load applications. Due to its high infeed Taros leaves plenty of room on the production floor for crew and forklifts to freely move around. Armed with future proof technology features Taros can easily compete with any robotic palletising opponent. And last but not least, Taros' cutting edge silhouette is surely the finest to encounter in the palletising industry.

High value of ownership

Built from the highest quality components Taros consumes up to 3 times less spare parts and less energy than comparable palletisers. Taros saves money from day one and supplies incredibly high levels of OEE (Operational Equipment Effectiveness).

3 Year warranty

With over 60 years experience it is in the tradition of CSi to supply very high quality standards. All our palletisers come with a standard 3 year warranty.

Global service availability

CSi offers service worldwide, with CSi service hubs and official service partners. The service offering ranges from 24/7 support and spare parts, to training, modifications and vertical start-up. Service contracts can guarantee maximum uptime for your asset, using risk-based maintenance analyses.

Product infeed height	3000, 3400 or 3800 mm
Pallet transport height	500 mm
Capacity	Up to 60 packs/minute (depending on product and pattern)
Loading height	2800 mm
Footprint	3200 x 3000 mm
Product dimensions	Min L150 x W100 x H65 mm Max L600 x W400 x H500 mm
Product weight	0.5 - 25 kg
Product types	Cartons, display packs, foil packs and crates
Pallet types	A variety of pallets such as EURO, CHEP, half pallets and plastic pallets

Options

- Available with Allen Bradley or Siemens controls
- Layersheet applicator
- Empty pallet destacker
- Label orientation
- Layer centering device
- Energy and airconsumption monitoring
- Remote diagnostics
- Communication packages
