i-Pal.

i-Pal has been created to earn your company money. Just plug it in and it never stops working. With its short delivery time of only 12 weeks, it is up and running in no time. And with its small footprint, it fits practically everywhere. Its end of line palletising concept allows for phased automation of multiple production or packaging lines. The mechatronic design, its multifunctional components and its reliable software bring a lot of functionality at very low operational costs.

Fit for purpose
We develop new industry standards together with our international partners, always making our products fit for purpose.

12 weeks lead time
We can deliver the i-Pal within 12 weeks with an installation time of only 5 days. Lead time depending on available production slots.

3 year warranty
With over 60 years of experience, we have a high quality standard. All our palletisers come with a standard 3 year warranty.

Financial options
With CSi smart palletising, you can buy, rent or lease your i-Pal. Our modular robot palletising technology with A-quality components makes this unit ultra-reliable in production output.

Challenges
The i-Pal platform is a modular platform, which enables integration of any customer challenge as an easy task. For any products that are not according specifications mentioned, please contact CSi to create a custom solution out of standard components.
