Message from the Founder of K-PAK Group

Since our inception in 1986, our focus has always been to serve the food industry with top-of-the line PACKaging solutions.

What started as a small operation with a humble monthly turnover of KWD 20,000 has grown into the regionally acclaimed K-PAK Group, yielding seven-digit figures in monthly sales.

This continued success is the direct result of the teamwork of our multi-cultural professional workforce.

The commitment and dedication to K-PAK Group's ethos are across all our employee status, from Labourers, Drivers, Operators, and Engineers leading to Top Management.

As a team, we are consistently striving towards sustainability to develop and deliver high-quality products, to introduce new PACKages and services to meet the ever-growing market and customers' needs, and to remain market competitive at all times.

Most importantly, we understand and appreciate the importance of time. To ensure that our customers are served within the minimum lead time, we have invested in ten production and storage locations across the Gulf countries.

With all the appreciation towards our team, we remain ever so grateful to all our customers who have entrusted us, throughout the years, with their business.

Together we were able to grow K-PAK into the success story it is today, focusing on continuous improvement. **Forever committed to being your most reliable partner.**

Abdulaziz Fahad O. Al-Serri
Founder Group Vice Chairman & CEO

WHY K-PAK?

100%
Recyclable

WE **CONTRIBUTE TO NATURE**
AND YOUR FOOD HYGIENE

Product Quality

- Our products undergo rigorous testing and quality control to ensure they meet the highest industry standards, providing you with reliable and exceptional performance every time.
- We are committed to continuous improvement, utilizing customer feedback and advanced technology to enhance the quality and durability of our products.
- Each product is crafted with meticulous attention to detail and precision, reflecting our dedication to delivering superior quality and exceeding your expectations.

Service Quality

- Our team is dedicated to delivering exceptional service with a focus on responsiveness, professionalism, and personalized support to ensure your needs are met effectively and efficiently.
- We strive to exceed customer expectations by providing prompt and reliable service, backed by a commitment to continuous training and improvement.
- Your satisfaction is our top priority, and we are committed to offering high-quality service through attentive care, clear communication, and a proactive approach to addressing your concerns.

K-PAK

AT A GLANCE

In 1986, K-PAK began in **Kuwait** as the first disposable tableware manufacturer in the Middle East. In 2000, it expanded to Dammam, **KSA**, under the S-PAK brand. By 2003, a third facility had been opened in Jeddah to meet Levant and European market demands. In 2007, a fourth facility, U-PAK Industries, was established in Ras Al Khaimah, **UAE**, for logistical advantages. In 2025, the new production facility will be in operation in Riyadh.

Today, K-PAK Group operates 10 facilities across the GCC, employing 1200+ employees and leading in industry innovation. We offer a wide range of disposable products for the food industry, including newly launched absorbent trays branded as **"Vampirella."**

K-PAK's expansion into Rigid Plastics (PET, PP, and HIPS) and Paper enhances its PACKaging portfolio. The company offers customized branded boxes and cups, maintaining a strong presence in **Kuwait, KSA, and UAE**, with distributors across the Middle East.

All products meet EU regulations and are ISO certified, with K-PAK being the first in the region to achieve green certification. In 2019, K-PAK launched **K-Concept** in **Dubai** to provide comprehensive PACKaging solutions, focusing on high-end catering, restaurants, and hotels. The company's success is driven by its commitment to meeting customer demands affordably.

The image is a high-quality photograph of three different bakery products, each presented in a clear Kraft tray. In the top left, a tray contains several golden-brown croissants. In the top right, a tray holds a whole, round cake with a smooth, light-colored frosting, decorated with a pink flower-shaped icing and a dark chocolate leaf. In the center, a tray displays two rectangular slices of cake. These slices are layered with white cream, orange slices, kiwi, and red berries. The trays are arranged on a dark, textured surface, with pink orchids in the background and foreground, adding a touch of elegance. A brown rectangular box with white text is overlaid on the top left of the image.

VAMPIRELLA K- STAR ABSORBENT TRAYS

VAMPIRELLA, K-STAR ABSORBENT TRAYS

Vampirella is a revolutionary effort by K-PAK to cater to meat and poultry processing industry.

- Absorbs excess liquid in food PACKaging
- Easy Processing ability
- Eliminates usage of pads
- Reduces handling of food safety
- Liquid resistance
- No leakage edges.
- Retains the aesthetics of display shelves.
- Retains product presentation.
- Absorbs liquid 5-8 times of the tray weight; 100% recyclable.

FOAM

Foam is a popular, lightweight, and affordable insulator, ideal for PACKaging hot, cold, and frozen foods. It is soak-proof, 100% recyclable, CFC-free, and hygienic. Common users of foam food PACKaging include farms, fast-food restaurants, supermarkets, hypermarkets, catering companies, hotels, and cafes.

THE ENVIRONMENT & FOAM, A STRATEGIC ALLIANCE

Recycling foam is simple, economical, and marked products can be easily processed at recycling plants. Products with Recycling Mark can easily be recycled at the plant.

Foam waste compresses more efficiently than rigid plastic, occupying less landfill space. CFC-free foam products are environmentally friendly, and utilizing polystyrene, a by-product of petroleum, is beneficial.

VAMPIRELLA TRAYS ARE EQUIPPED WITH

HIGHLY ABSORBENT SOLVER

Vampirella tray is a highly absorbent poultry tray developed with new technology for the food industry and optimum solutions for individual requirements.

IMPROVED HYGIENE

Vampirella products ensure that any kind of liquid is absorbed, and PACKaged products give a hygienic and neat look. At the same time, the product controls the outgoing pressure, and the liquid remains in the absorbent layer.

INDIVIDUALITY BY COLOR .

Available in a large color palette Individual choice on the product to be PACKaged for high recognition value for consumers.

FULL SURFACE ABSORPTION

Entire fluid intake via micro-holes spread over the full area, including the border and angle frame. Nothing remains visible; nothing appears to come through. The Vampirella tray is attached to the shell's edge when closed. Thus, the leak is prevented. The foil stays clean and appealing.

CONTEMPORARY PRESENTATIONS

The quality of the PACKaging product is noticeable. Vampirella was attained with a cautious neutral design combined with great utility and an engaging appearance. Fresh meat, fish, and poultry are available when customers want them.

With liquid absorbing properties

Polystyrene Requires Less Energy To Produce

An average-weight polystyrene foam cold cup requires approximately half as much total energy to produce than a representative weight wax-coated paperboard cup. If all polystyrene PACKaging were replaced with corrugated cardboard, paper, wood, moulded fiber, etc. compared with current figures, raw material requirements would rise to 560%, power consumption to 215%, and landfill volume to 150%.

Polystyrene PACKaging requires less energy than many other material of similar design.
