COMPANY PROFILE

HATZIOAKIMIDIS is a model company that manufactures slaughterhouse equipment. The company was founded in 1983 by Mr. Grigoris Hatzioakimidis and to date has gained the largest share of the Greek market while at the same time is expanding to Europe, Asia and Africa. To date, it has installed state-of-the-art production units in countries such as Israel, India, Egypt, South Africa, Cambodia, Armenia, Sudan, Uganda and through its network of partners is continuously expanding to more countries.

The company is in the field of design, production and installation of slaughterhouses for cattle, sheep and goats and pork according to European standards but also with special international standards such as halal and kosher.

Its successful course is based on three pillars:

know-how | infrastructure | human resources.

The primary goal is to ensure quality and create bespoke solutions tailored to the needs of its customers.

PRODUCTS OF MAXIMUM QUALITY

The privately owned facilities of the company are located in Nea Pella, Giannitsa, just 40 km away from Thessaloniki, in an area of 6,000 m², fully equipped with up to date machinery for accurate and quality processing of steel.

The main production line of the company are in a building of 2,000 m² and there is a supplemental production facility with a total area of 12,000 m² for additional work.

HATZIOAKIMIDIS designs, implements and produces three different slaughter lines using the best raw material and under detailed quality control.

The automation system uses the highest technology in order to give important solutions to the productivity process of the slaughter house.

The product range is as follows:

CATTLE SLAUGHTERLINE

- Capacity from 5-150/hour
- Robust construction
- Size according each country animals size
- Minimum labor cost

PIGS SLAUGHTERLINE

- Capacity from 10-500/hour
- Smooth & calm stunning technologies
- Depilated or skinned pigs in the same line
- Extra low maintenance cost

SHEEP SLAUGHTERLINE

- Capacity from 50-500/hour
- Flexible solutions from small to big animals
- Minimum labor cost
- Simple and efficient slaughtering process

AUTOMATION PROCESS

- Traceability of animals
- Information system for the owner
- Information system for the maintenance engineer
- Optimization of the productivity process

VARIOUS INSTALLATION OPTIONS

- Full installation of our qualified engineers
- Installation supervision by our supervisors
- Combined installation procedure
- Trial slaughtering to verify the right process

AFTER SALE SERVICE

- 24/7 technical phone support
- Qualified technical staff available for the immediate visit to your slaughterhouse
- Fully equipped warehouse of spare parts for the immediate shipping
- Special automation for slaughterhouse remote control
- Special automation for remote visual supervision
- AR Assistance

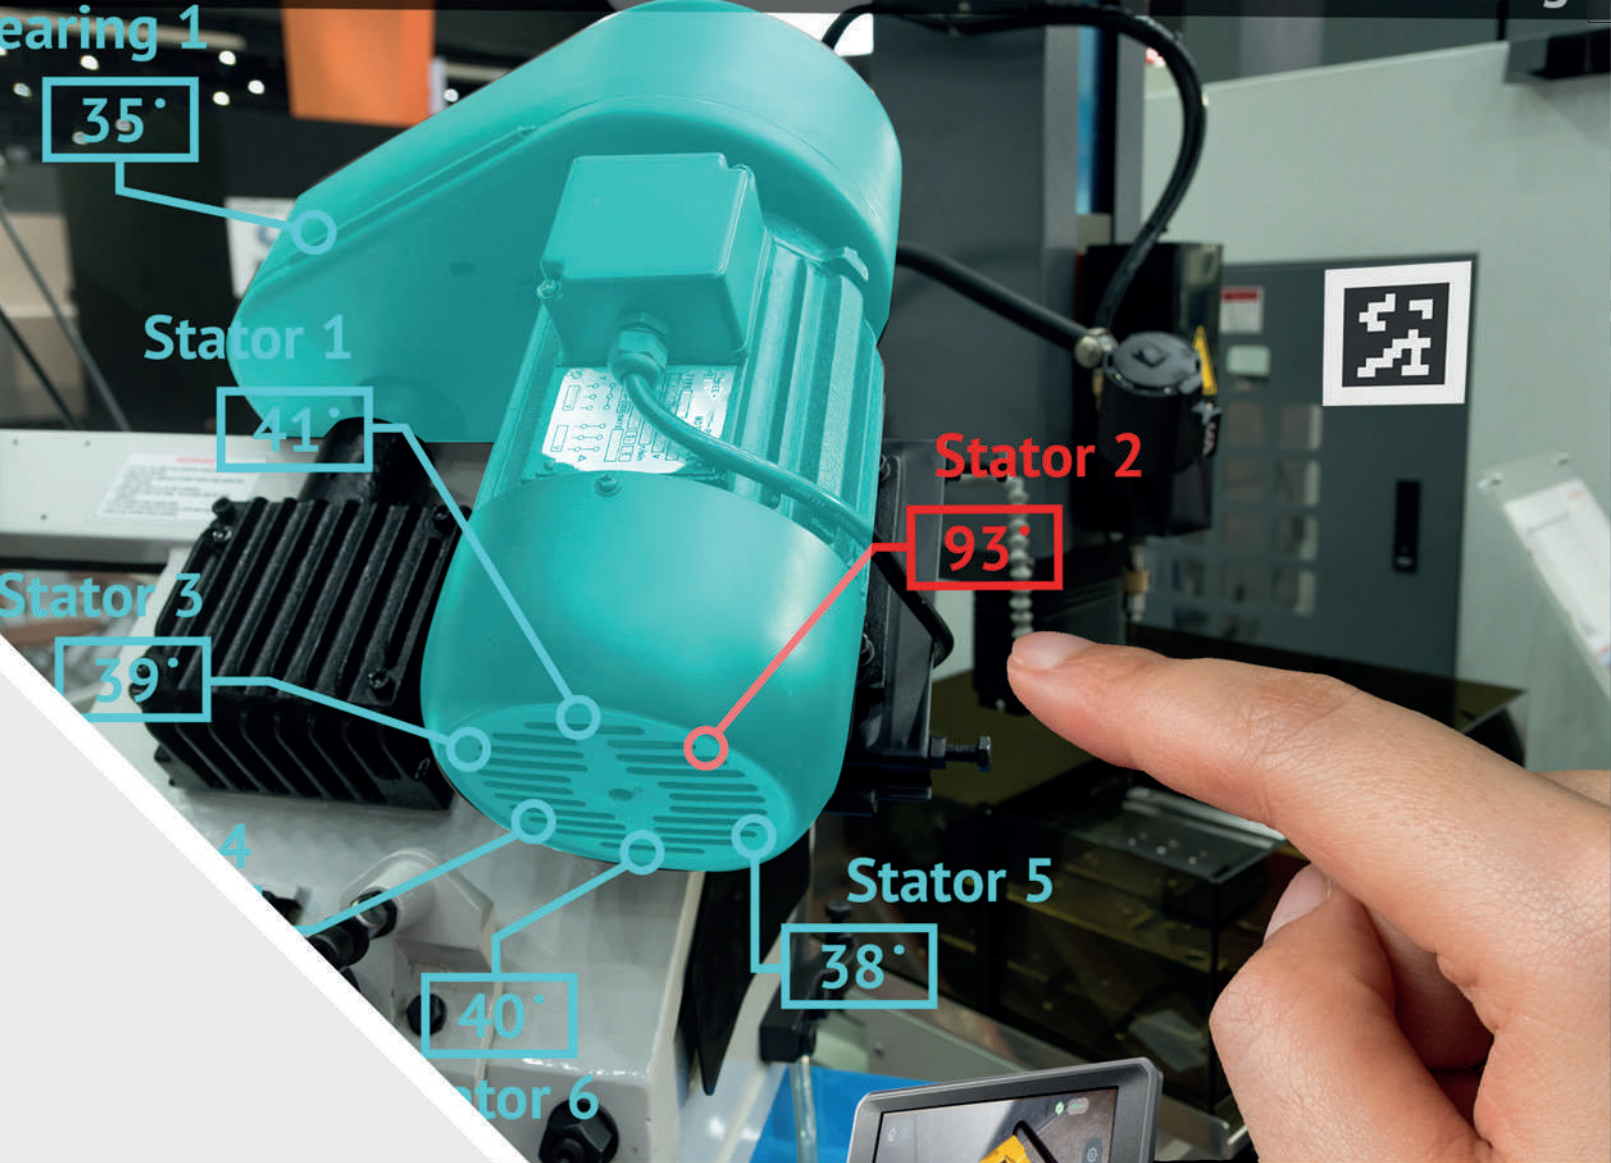

OPERATION TRAINING

- Slaughterhouse operation training courses
- Engineering and maintenance training
- Training for appropriate use of equipment

SLAUGHTERING TRAINING

- Training from a qualified slaughterer
- Training period according client needs
- Significant benefits in quality after training

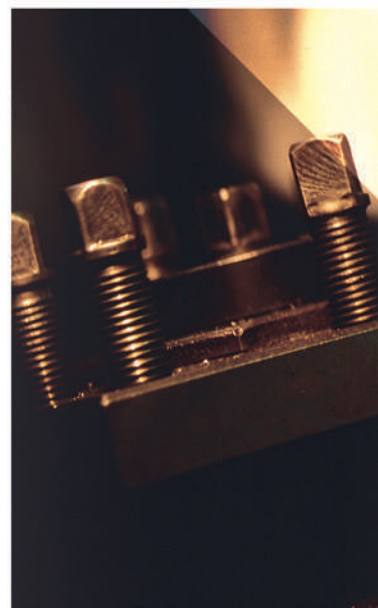

HATZIOAKIMIDIS INNOVATIVE AR ASSISTANCE

- Expertise is critical in the field, where productivity directly impacts profitability. COMPETATIVE ADVANTAGE IS OUR TURN KEY SOLUTIONS

The main factors that distinguishes the company in the global market can be summarized as follows:

- Many years of experience and knowledge.
- Study, design, production of slaughterhouses separately for each customer based on their requirements.
- Research and development of new products, using new technologies and operating methods.
- Immediate technical support, development of methods for either remote or on-site technical support, by highly specialized engineers.
- Privately owned building facilities equipped with the appropriate technological equipment.
- Information systems for immediate and proper service.

CUTTING EDGE TECHNOLOGY

The successful course of HATZIOAKIMIDIS was determined by the skills of its specialized engineers and the use of cutting edge technology. The company pays special attention to the technical details of the produced machines, selects high quality raw materials of well known suppliers and by uses the most modern technology. Detailed attention is paid in every process that ensures a long lasting operation of the machines and of the entire slaughter line.

OUR **GOAL**
THE FINEST **QUALITY**

RESEARCH AND DEVELOPMENT

The R&D department focuses mainly on the search for new technologies and market trends, in order to improve existing products and design reliable machines with innovative features. The technological development of the company is its driving force and every action is focused on the production of machines that will provide unique solutions to its customers. Each new machine is tested in real conditions to perfect and document the quality of its construction, prior of installation in a slaughterhouse.
