

REIMAGINING PLASTIC

About us

Nestled in the heart of Dubai, Precision stands today as a leading manufacturer of packaging products in the Middle East, continually expanding and adapting, a testament to over 40 years of innovation and excellence. Utilizing cutting edge technologies, Precision now produces over 1 billion packaging components and world-class engineering products every year, across four state-of-the-art facilities in the UAE and KSA.

We offer innovative solutions across various industries, such as food and beverages, home and personal care, lubricants, and pharmaceuticals providing our clients with exceptional packaging products tailored to their specific needs.

From concept to production, we provide seamless end-to-end services, ensuring that every stage-from design to manufacturing-meets your unique needs. This commitment is encapsulated in our tagline, "Shaping Ideas."

Owned by two of the UAE's most respected corporations, Al Tayer Group and ARMS Group, supported by a team of 500 employees we are inspired by nation's founders vision of innovation, growth, and leadership shaping our mission, driving us forward.

Our commitment to sustainability drives us to create eco-friendly packaging that promotes positive environmental change, reflecting our responsibility as a forward-thinking industry leader.

Advanced Packaging Technologies Tailored for Your Needs

At Precision, our cutting-edge technologies ensure that your packaging is designed and manufactured to elevate your brand while meeting your production and sustainability goals. Here's how we can help you achieve that:

Injection Moulding

When it comes to high-quality, flexible, tailor-made caps and closures, our advanced injection moulding technology offers the consistency and precision you need. Powered by high-speed, energy-efficient machines from leading European manufacturers, incorporating latest technologies like cube, bi-injection, stack, In-Mould labelling etc. supported by robots and automations streamline the process, providing solutions tailored to meet diverse customer expectations.

Compression Moulding

For specialized high volume closure applications our compression moulding technology excels. With European machines capable of producing up to 2,000 caps per minute equipped with inline vision inspection system to monitor each cap for precision, ensuring consistency in every batch we deliver.

Extrusion Blow Moulding

For innovative lightweight bottles and jars of various shapes and sizes, we utilize extrusion blow moulding to produce HDPE and PP bottles ideal for a variety of industries. Our European multi-layer machines enable the creation of light-weight bottles, utilizing PCR designed to meet sustainability goals while maintaining product integrity. Features such as multi-point parison control ensures precise wall thickness for complex shapes and innovative designs, ensuring optimal weight and performance making your packaging stand out in the market.

Injection Stretch Blow Moulding

We manufacture lightweight PET bottles that provide the clarity, strength, and recyclability needs for various applications using technologically advanced ISBM machines from Japan ensuring efficient, high-quality products that balances sustainability with exceptional quality.

Decorations

From Shrink Sleeving and Stretch Sleeving to Self Adhesive Labelling, OPP labelling and Heat Transfer Labelling, we provide a range of customization options to ensure your packaging aligns with your branding requirements.

Thermoforming

For dairy, ice cream, poultry, and other food products, our thermoforming technology produces a wide range of visually appealing cups, lids and trays. Utilizing start-of-the-art European extruders and high speed formers supported by high-definition 8-color printing technology and labelling technology, we enhance your brand's visibility and impact.

Precision Quality: Uncompromising Standards, Superior Packaging Solutions

At Precision, quality is the foundation of our operations, ensuring that our packaging solutions consistently deliver value to our customers. With advanced technologies, a highly qualified team, and globally recognized certifications, we are committed to exceed your expectations.

Our Quality Assurance processes are designed to provide you with confidence in our products. We adhere to strict international standards, including ISO 9001:2015, ISO 14001, ISO 45001, and BRCGS, guaranteeing excellence at every stage of production. As a Sedex-certified company, we uphold high ethical standards, ensuring that our practices align with your values.

Our Quality Control measures are integral in maintaining the highest quality standards. We employ advanced CMM machines to conduct precise measurements and inspections, ensuring that every product meets our stringent specifications. By proactively engaging with customers and partners, we ensure that we not only meet but exceed your expectations in packaging solutions.

Sustainability at Precision: A Commitment to the Future

At Precision, sustainability is a core responsibility embedded in every stage of our manufacturing process. We focus on eco-conscious product innovation, developing environment friendly solutions that maintain safety and functionality while minimizing carbon foot print. All our products are 100% recyclable and has the least carbon foot print in comparison to alternate materials. Our operations are optimized to conserve resources, reduce waste, and leverage renewable energy

including solar power. We foster an ethical workplace, recognized for labour welfare, with 25% of our workforce serving over a decade. We are an equal opportunity employer focusing on diversity with special attention to differently abled people. Partnering with us, your brand aligns with a company dedicated to sustainable, responsible, and ethical practices. Together, we can protect the planet while delivering reliable packaging solutions.

Your Advantages with Us

Reliability

- Over 40 years of expertise in the GCC packaging industry

One Stop Shop

- Comprehensive solution from concept to final product
- Engineering and tooling capabilities under one roof
- Custom design and moulding services to meet unique packaging needs

Peace of Mind

- Local manufacturing ensures efficient supply chain
- Proven track record of delivering high-quality products and timely service
- Four production units in UAE and KSA ensuring uninterrupted supply

Service Assured

- Responsive and efficient customer service tailored to your needs
- Agile supply chain with own fleet of delivery vehicles

Loyal Local Partner

- Strong network with MNCs and GCC companies
- Long-term strategic vision to grow with your business

Precision Packaging, Damman, KSA

At Precision, we don't just offer packaging, we offer solutions that drive your brand forward. Every step of our process is designed to ensure your packaging is as functional as it is visually appealing, meeting the highest standards of quality and innovation.
