

HEALTH. TRUST. SAFETY.

WHO WE *Are*

At Freshline Agro, excellence is not just a word, its the only way of doing work. We believe top-notch quality of our food products are an integral part in managing food security challenges, facing the world today.

Our state-of-the-art Dehydration facility at Indore is a testimony to our relentless pursuit of operational excellence to preserve maximum nutritional value of fresh vegetables. Our backward engagement with farming community ensures we have complete transparency of the entire food value chain for our chosen products.

Our *Vision*

Food security is one of the burning issues faced by our country and mankind in general because of erratic weather patterns, decreasing soil fertility etc. At Freshline Agro, our vision is to address food security concerns by trying to reduce the wastage from "Farm to Fork" supply chain and ensuring that nutrient-rich fruits and vegetables are available for all.

We do this by completely integrating the entire food value chain, starting from an exclusive tie-up with Central India's largest vegetable seedling nursery Gurukripa Agro, contracts with motivated commercial farmers and FPOs, dependable logistics partners, State of the art dehydration unit set up and reputed quality-conscious food manufacturing companies downstream.

Our *Mission*

At Freshline Agro, our mission is steadfast: to uphold the nutritional value of vegetables without relying on harmful chemicals or preservatives.

We're on a quest to accomplish this through the establishment of an advanced food processing unit, specializing in dehydration. Strategically situated in the core of India's agricultural hub and the pristine city of Indore, our facility showcases our unwavering commitment.

Our aim is to protect the intrinsic goodness of nature's harvest, crafting products that reflect our dedication to quality and purity.
