

# COUNTERTOP FLAVORING SYSTEM

## AROMAT-BI

AROMAT-BI is a counter-top flavoring appliance, created to be used in the R&D laboratories of the flavoured products manufacturers.

### FEATURES:

- It is completely built of stainless steel, it has a nozzle for nebulizing the oil and a micro-doser to sprinkle the flavours/salt.
- The oil is nebulized thanks to a mini compressor inside the machine.
- The Aromat-BI has got a touch screen HMI through which it is possible to set the parameters of the oil and powder to be used: the quantity of product to be flavored (max 500gr./per batch), the percentage of oil to be sprayed and the percentage of powder to be sprinkled.
- Once the Aromat-BI is started, it will automatically calculate the quantity of oil and flavour to be used according to the weight of the product loaded into the tumbler, as per settings.

MODEL	CAPACITY (g/h)	POWER (kW)	DIMENSIONS (mm)	WEIGHT (kg)
Aromat-BI	Up to 500	0,15	460x840x825	40
