

AGI is a global expert in providing farmers, processors and commercial customers with the right equipment and customised engineering solutions to produce, protect and deliver the world's grain, fertilizer, seed, rice, feed and food supplies.

For over 30 years, AGI's Europe, Middle East, and Africa (EMEA) division has been focused on providing solutions that meet the unique needs of the region. From its headquarters in Ozzano dell'Emilia, Bologna, Italy, and state-of-the-art production facilities across Europe, AGI serves a wide range of customers, from small farms to grain traders, millers, feed mills and large port facilities.

STORAGE

AGI is one of the world's largest manufacturers and suppliers of corrugated steel silos for commercial and farm applications. Our ancillary products include catwalks, ladders, platforms, towers, aeration systems and temperature sensing systems.

Flat Bottom Silos

AGI's array of flat bottom silos range from 3.64 up to 32.74 m in diameter with volumetric storage capacities that can exceed 28,897 m³. A standard 30° roof pitch ensures maximum storage capacity, even with a high angle of repose. Suitable for all free-flowing commodities including wheat, maize, barley, rapeseed, soya beans, rice, sunflower, canola and even wood pellets.

Hopper Bottom Silos

AGI hopper bottom storage silos offer versatility, fast assembly, and low cost per tonne. Perfect for frequent product unloading cycles, hopper bottom silos ensure minimal residual material is left in the silo, while freeing you from the use of mechanical unloading equipment. AGI offers two hopper models: 45° and 60°. With their high friction angles, they are an ideal solution for wet products.

HANDLING

AGI is a leading manufacturer of material handling equipment for grain storage and processing. Our product range includes bucket elevators, chain conveyors, open belt conveyors and flight conveyors. Handling capacity ranges from 20 t/h to 2,000 t/h.

Bucket Elevators

AGI bucket elevators are strong, durable and provide gentle handling of commodities. Our equipment is designed and manufactured for daily harvest operations requiring capacities up to 200 t/h, or for traders, commercial plants, processing plants, and port terminals needing capacities up to 1,500 t/h.

Chain Conveyors

AGI offers a range of versatile chain conveyors, from those designed for small storage and seasonal traders requiring capacities of 20 t/h to 300 t/h, to heavy-duty applications designed for commercial facilities, processing plants and port terminals, offering capacities up to 1,200 t/h.

CLEANERS

High-quality AGI cleaning machines are manufactured using numerous bolt-on components, making maintenance and parts replacement easy. Operating platforms are properly sized to provide a safe workspace during operation and while changing screens. Bags can be positioned on either the left or right side, depending on customer needs.

RICE MILLING SOLUTIONS

AGI has an extensive portfolio of rice milling equipment including cleaning, drying, de-husking, whitening, polishing grading, sorting, blending and packaging machines to meet grain processing requirements. Each is designed to help you maximise both yield and profitability. Fast delivery and excellent after-sales round out the performance promise of AGI rice milling solutions.

FERTILIZER SOLUTIONS

From blending, to conveying to declining weight systems, AGI can offer customised solutions for every dry fertilizer application need. Take advantage of products like AGI Plant Manager, which can provide a view into your entire plant operation, including monitoring material consumption, inventory and plant productivity.

FEED MILL SOLUTIONS

AGI has an extensive portfolio of feed mill equipment including scales, surge hoppers, hammer mills, mixers, micro dosing systems, molasses addition systems, pelleting lines, including conditionings, pellet presses, coolers and crumblers as well as liquid/oil addition systems and bagging lines. Each system is designed according to your requirements with thought given to your specific recipes to help increase efficiency, reduce waste, and profitability of your livestock. Fast delivery and excellent after-sales round out the performance promise of AGI feed mill solutions.
