# THE ITALIAN FOOD TECHNOLOGY

---

CFT Group's history begins in 1945, from the idea of the entrepreneur Camillo Catelli who started to produce machines for the tomato processing industry in a small factory in Parma, Italy.

Today CFT Group designs and manufactures machineries and complete turn-key lines for the processing and packaging of Food, Liquid Food, Beverage and Non-Food products.

The company mission is to provide customers worldwide with the most advanced technological solutions, to be flexible in creating custom-made systems and reliable in guaranteeing premium quality and service.

# HISTORY OF CFT GROUP

## 1945

The story began in 1945 from an idea of Camillo Catelli, who started to produce machines for tomato processing industry in a small factory in Parma (Italy).

## 70's

The 70's were the years of big innovation and new products' launch. Vesuvio peeler, Califfo and Venus evaporators, UHT Stematic Long Run and Olympic sterilizers were only a few of great innovative new products.

## 1990-2000

The 90's were the booming years for chinese tomato processing industry. In the early 2000 the first Apollo evaporator was installed.

## 2007

The company **Raytec Vision**, leader in the sorting technologies industry, became part of CFT Group.

## 2014-2016

In 2014 all Italian operational and commercial activities are concentrated in a single plant. In 2016, the company **Rolec Prozess und Brautechnk** became part of CFT Group and we started to work together for the Brewing industry.

## 2018

We consolidated our range of End of Line solutions and acquired two Italian companies: **COMAC**, leader in kegging and bottling systems for the Brewing Industry.

## 2019

We acquired the italian company **SIAPI**, which operates in the blow-molding market designing high quality technological solutions in PET, PP, PLA and other resins.

## 2021

CFT Group became part of **ATS Corporation**, an international group that provides industry-leading automation solutions for many of the world's most successful companies.

## 1957

In 1957 the first Rossi & Catelli evaporator was patented.

## 80's

In the 80's innovation continued. New ideas were developed, and new products such as the enzymatic inactivator Eldorado were born.

## 2005-2006

In 2005 **Manzini** and **Comaco** were acquired by Rossi & Catelli. In 2006, Rossi & Catelli became CFT (Catelli Food Technology).

## 2011

**SBC** was acquired by CFT Group, adding a significant know-how in the beverage sector.

## 2017

The company **Levati Food Tech**, leader in batch retorts design and production, became part of CFT Group.

## 2020

The brand CFT Robotics was founded to develop state-of-the-art robotics systems mainly for the End of Line sector.

## 2024

CFT implemented two cutting-edge technologies: the Art3mis MVR Evaporator and the performance monitoring system Digital Tomato.

# OUR VALUES

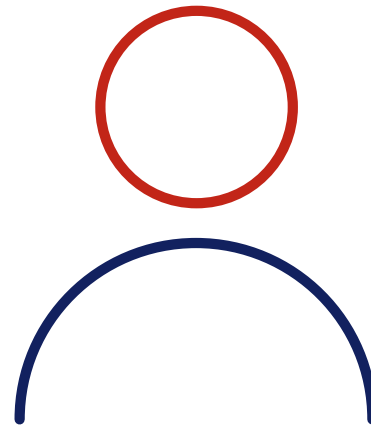

## INNOVATION

With 80 years of innovation as our hallmark, we daily transform this know-how into state-of-the-art solutions, adapting to a constantly evolving market. Rooted in a culture of continuous improvement, we consistently challenge ourselves to enhance our products and services.

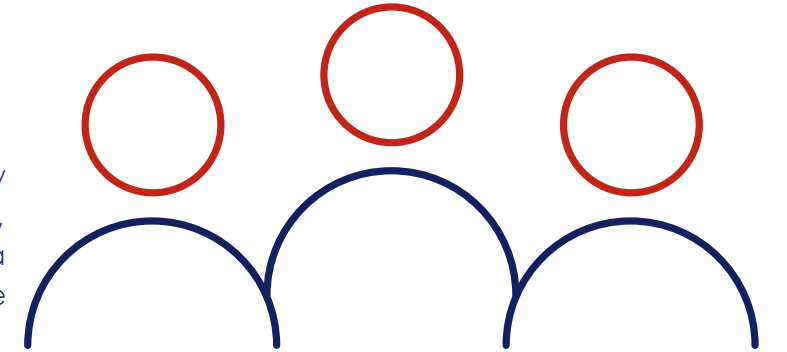

## CUSTOMER FIRST

Customers' needs are at the heart of each of our projects, and we work every day to excel in providing tailored and customized solutions. We believe in the power of cooperation to support the success of the companies that trust us, fostering their growth and satisfaction.

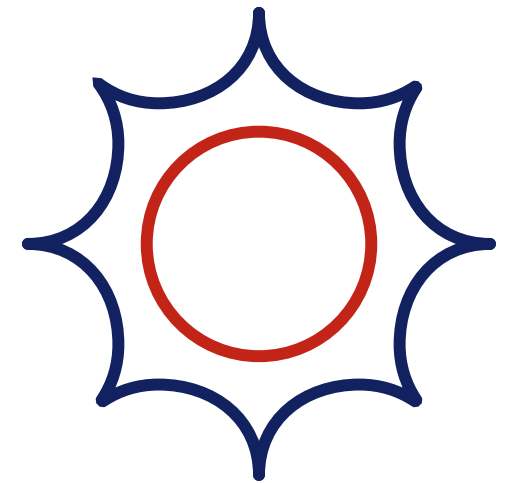

## PEOPLE

With 80 years of innovation as our hallmark, we daily transform this know-how into state-of-the-art solutions, adapting to a constantly evolving market. Rooted in a culture of continuous improvement, we consistently challenge ourselves to enhance our products and services.

## SUSTAINABILITY

We are committed to continuously improving our environmental performance and developing cutting-edge technologies to help our customers reduce their environmental impact, including the reduction of waste, water consumption, and greenhouse gas emissions.

# CFT & ATS

Since 2021 CFT has been acquired by the ATS Corporation group, a world leader in industrial automation systems. CFT is now proudly part of the ATS Food & Beverage business segment.

We strongly believe that the synergy between Food Processing, Food Packaging and Automation can represent the added value for the future successes of our group.

# BUSINESS

FOOD

# BEVERAGE

# TECHNOLOGIES

## LIQUID FOOD PRIMARY PROCESSING

Complete portfolio of premium machines and technologies, which allow the first transformation of the raw ingredients into semi-finished products. This range include evaporators, peeler, choppers, extractors and refiners.

SINCE 1945, WE  
ARE WORLD LEADERS  
**IN TOMATO  
AND FRUIT  
PROCESSING**

# LIQUID FOOD SECONDARY PROCESSING

Our Secondary Processing range includes specific equipment which allows to obtain a finished product, ready to be filled or packaged.  
The main technologies here are sterilization and pasteurization, aseptic filling, mixers and cookers.

# SOLID FOOD PROCESSING

Our solid food processing technologies provide solutions for fresh and pre-cooked vegetables.

# POST FILLING THERMAL TREATMENT

Thermal Treatment solutions including retorts, spirals and freezers.

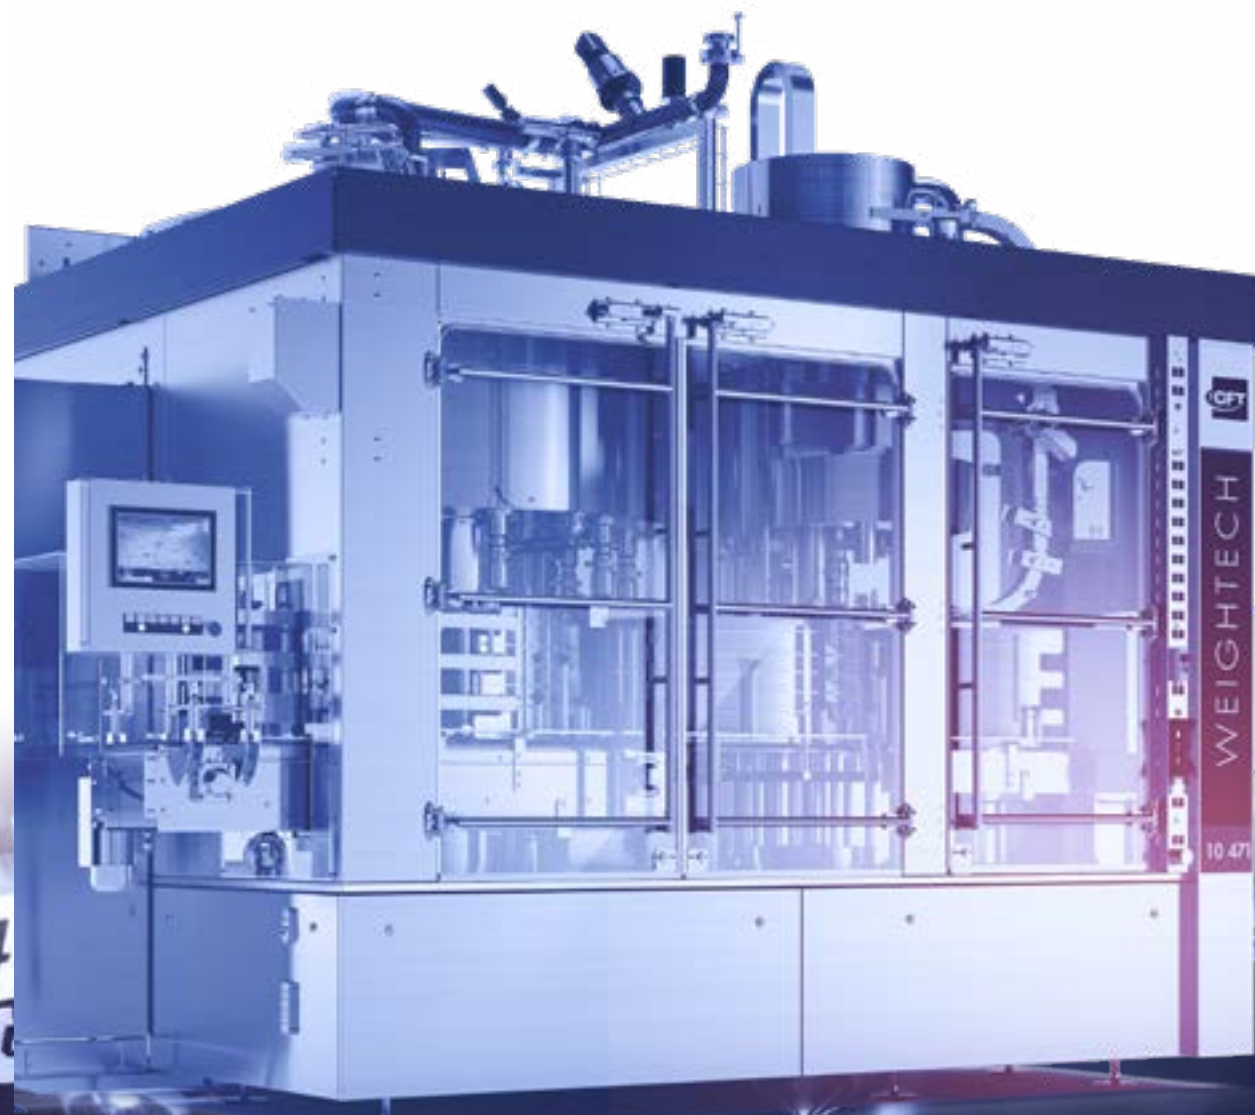

# FOOD FILLING & SEAMING

Our food filling machines are designed for a wide range of products, formats and speeds.

The Seaming range from the 2000 series (specific for food filling) up to the 3000 range.

The filling range also includes different solutions for the non-food industry (lube oil and chemicals)

# BLOW MOLDING

Our company Siapi provides top quality blowing machines for bottles and containers in PET, PP, PLA and other resins.

# BEVERAGE FILLING & SEAMING

Our fillers' portfolio for Beverage Industry includes a wide selection of machines, designed with different technologies and suitable for many kinds of beverages.

Our complete range of seamers from medium to high speed, are widely used in the Beverage Industry for sparkling and still soft-drinks, energy and isotonic drinks, ice-tea, beers and water.

# BEER FILLING & SEAMING

Our fillers' portfolio for Beer Industry includes a wide selection of machines and designed with different technologies.

# SECONDARY PACKAGING

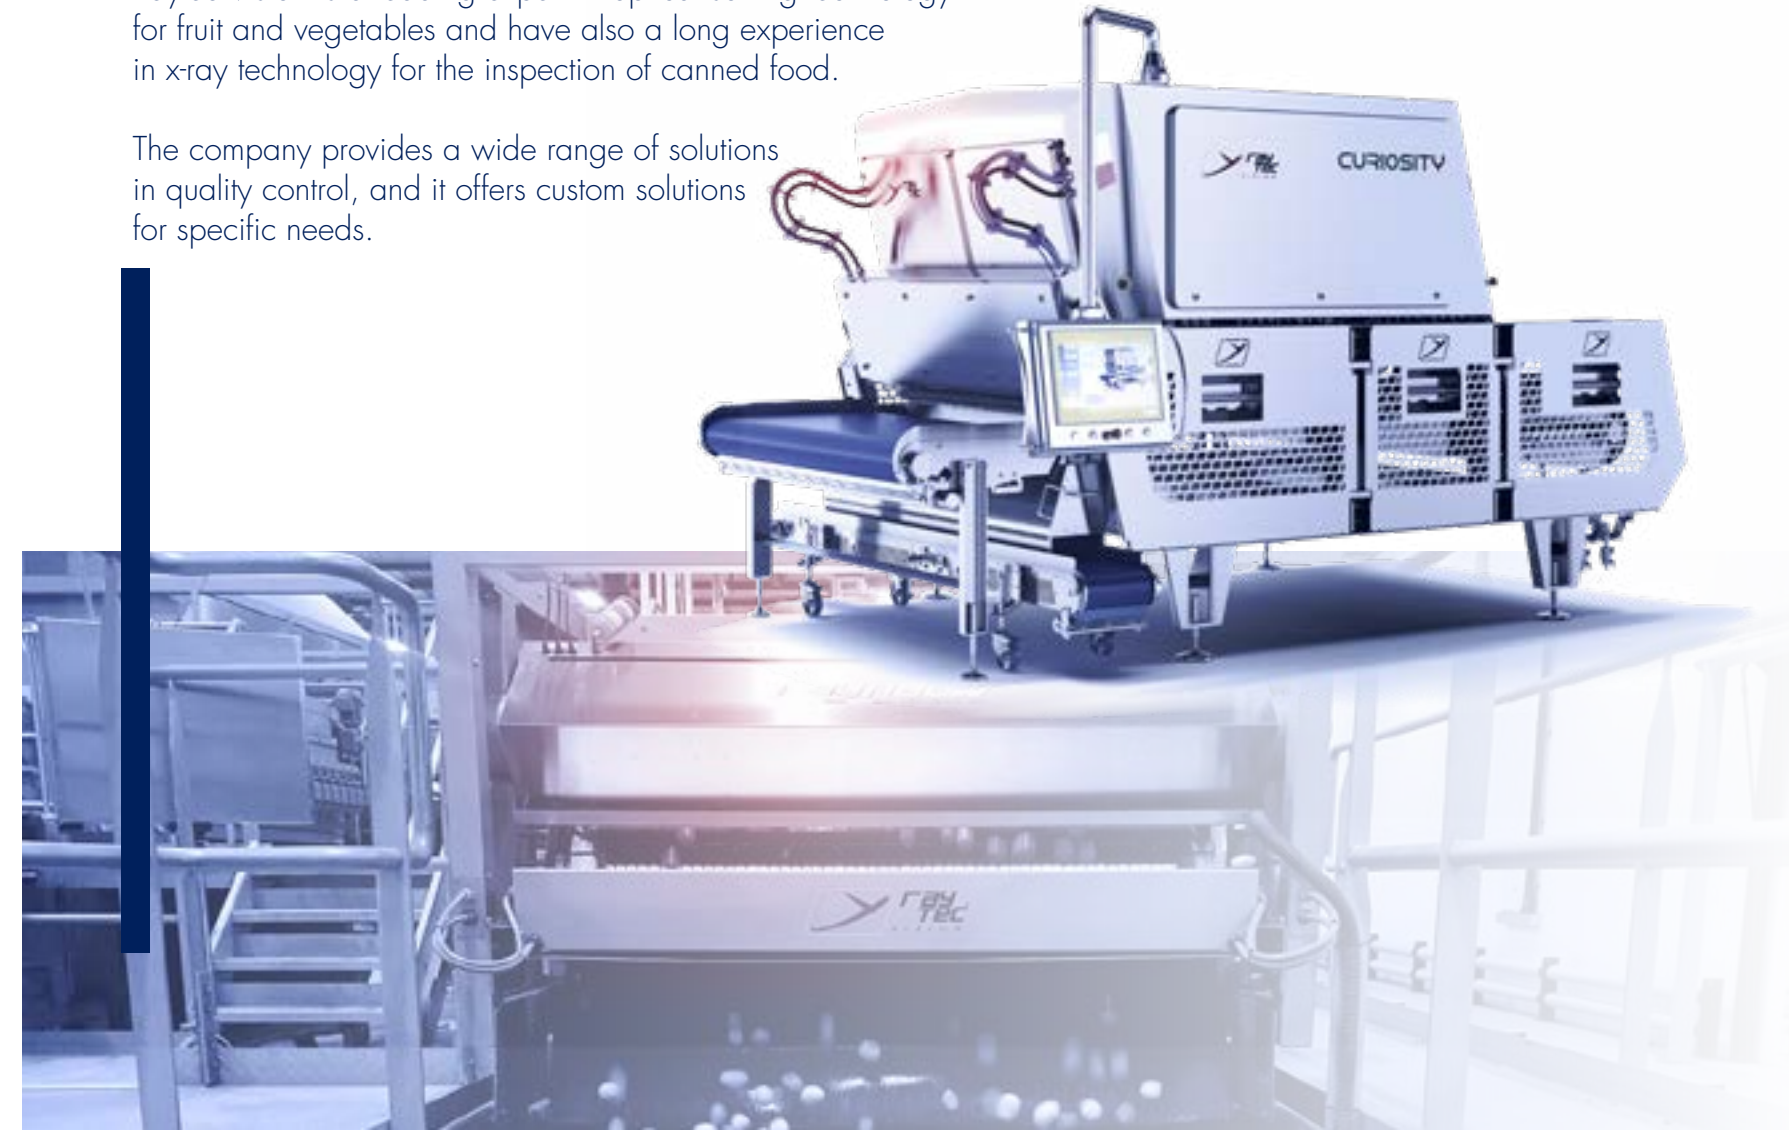

Our End of Line technological platform features automated solutions for primary and secondary packaging equipment, sorting and product treatment.

# SORTING

Raytec Vision is a leading expert in optical sorting technology for fruit and vegetables and have also a long experience in x-ray technology for the inspection of canned food.

The company provides a wide range of solutions in quality control, and it offers custom solutions for specific needs.

# SPARE PARTS & AFTER-SALES SERVICE

Our support services include remote support, predictive maintenance, on-field training and state-of-the-art engineering for all our technologies.
