

Automation and Robotics  
for the food industry

As specialists in automation,  
**we design and implement  
robotic processes and solutions  
for the food industry.**

**100**  
employees

**40** years  
of experience

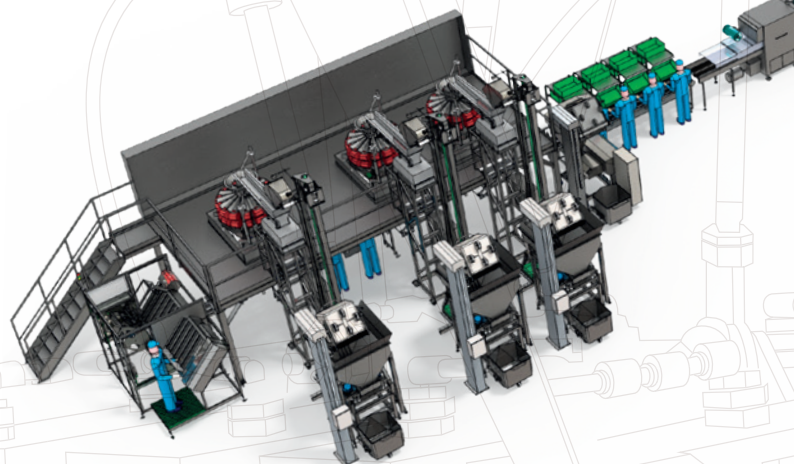

Engineering  
capacity

**40**  
people

Present  
in

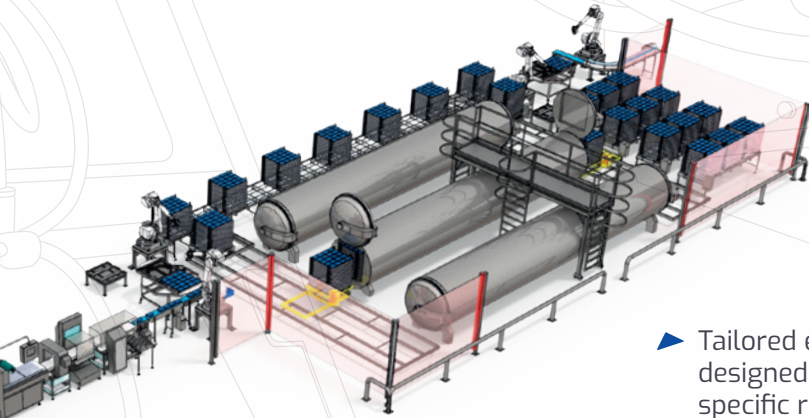

**24**  
countries

Over  
**500**  
robots  
installed

## Designer & Manufacturer

With our extensive experience and the expertise of our engineering team, we are capable of offering solutions ranging from simple robotic cells to complete production lines.

- ▶ 100% of mechanical design and automation studies are carried out by our in-house engineering teams.

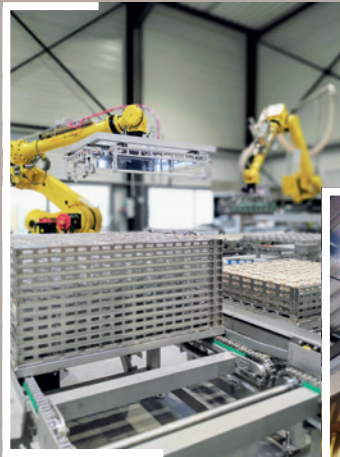

## Integrator

In order to provide a turnkey solution, we integrate your existing machinery as well as equipment such as multihead weighers, thermoformers, retorts, and more.

## ► Retort Room Automation

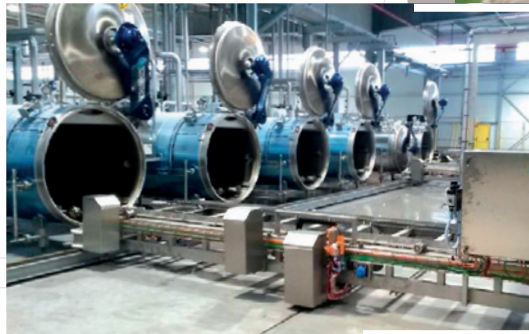

We have acquired international expertise and garnered a reputation for delivering complete pasteurization and sterilization lines. Our retort management system ensures product traceability and integrity, guaranteeing the highest standards of quality.

## Customized Turnkey Processes

From basket or tray loading to drying, including retort loading/unloading shuttles, our solutions can be fully automated. Our grippers are tailored to accommodate your products:

- ▶ Sealed or thermoformed trays
- ▶ Doypacks
- ▶ Sticks
- ▶ Cans
- ▶ Jars...

## ► Raw Product Handling

Through innovative processes, some patented, we specialize in the handling of raw products.

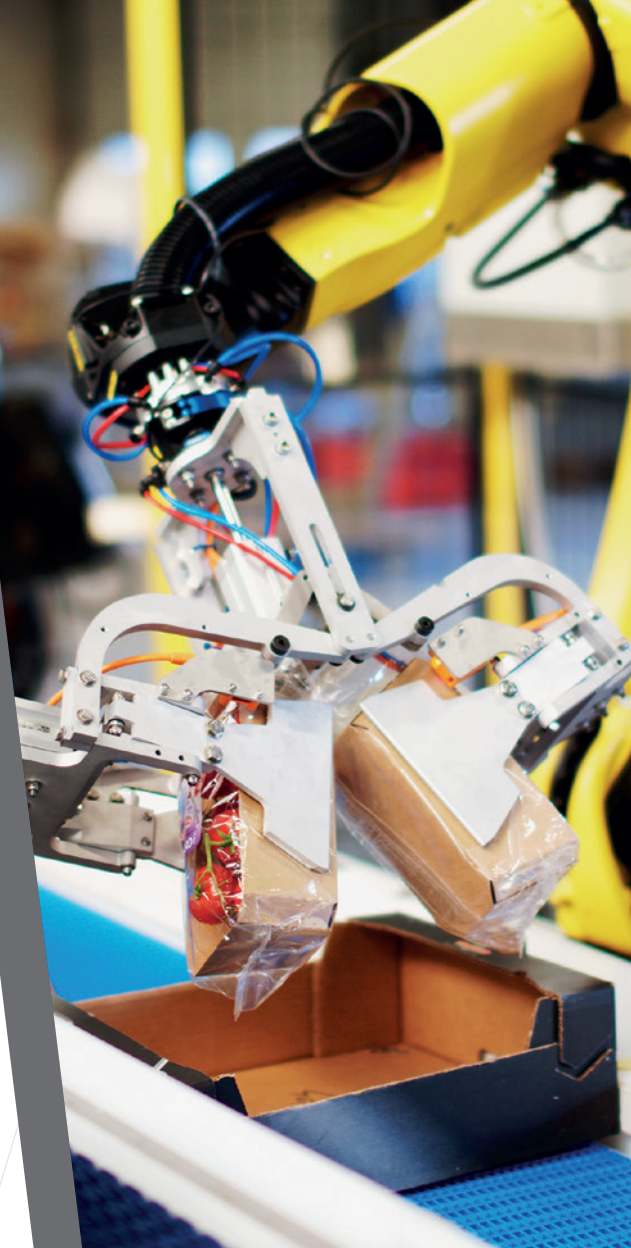

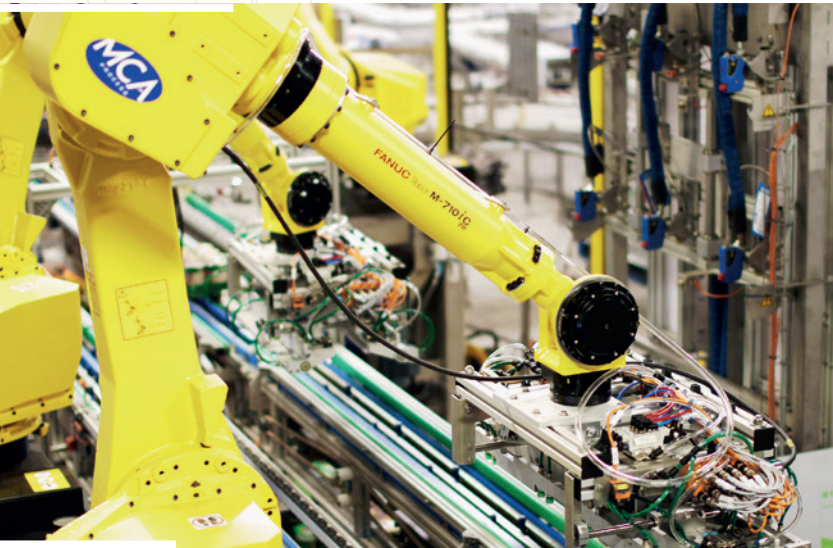

- Ready meal production line
- Automated hamburger assembly line
- High-speed burger packaging Line
- Automated poultry packaging line

## ► End-of-Line, Packing

With each need being unique, we adapt to your constraints and offer tailored end-of-line solutions.

- ▶ Robotized cartoning: top load, side load
- ▶ Flowpack loading
- ▶ Thermoformer loading
- ▶ Robotized case packing
- ▶ EasyPal: American cases, carton crates, shelf-ready packaging, plastic crates, etc.

## ► Customer Support

Our customer support team is entirely dedicated to meeting all your requirements. We offer:

- Training for maintenance and production teams
- Remote access via VPN
- Maintenance contracts
- Operational audits
- Upgrades for installations
