CASE PACKER MACHINE

8 servo
Motors

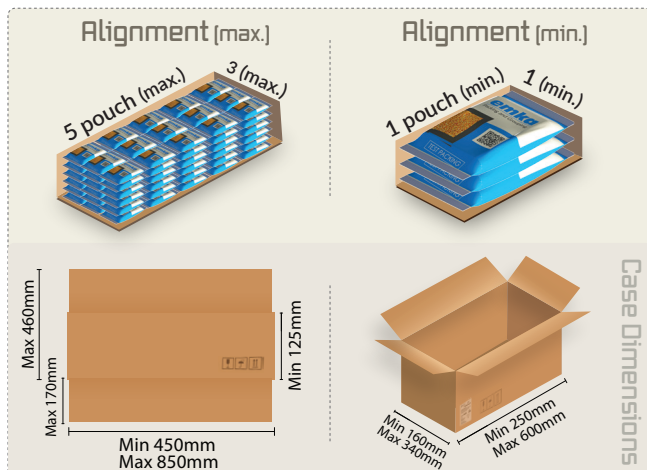

FEATURES

- Motion PLC System
- Servo-motors
- Drive-motors
- High precision planetary gear drive systems
- "Low Case Amount" warning and automatic stop system
- Safety switches and protective covers
- Statistics Page with Custom Encryption
- Settings Page with Custom Encryption
- 12" Color Touch Screen
- Vibration System
- Case compaction system
- 'Out of tape' sensor
- Remote access module (Optional)

ADVANTAGES

- Automatic adjustment of the case magazine and case transport conveyor systems
- Automatic case size adjustment, saving and easy transition
- Servo-Driven package alignment
- Optimum package layout with vibration and case compaction system after case filling unit
- Easy control of machine functions and parameters by the color touchscreen
- Double and single-corrugated case production
- Intervention of the packaging machine from the case packer machine
- The machine's easily adaptable design allows for different layouts.
- Unique machine designs, considering technological innovations and customer needs.
- With its unique design, labeller and printers can be easily integrated.
- Easy automatic adjustment during case transfers

PACKAGE TYPES TO CASE

* Customized design with desired case dimensions

AIR PRESSURE	POWER SUPPLY	TOTAL POWER	WEIGHT
6 Bar (min.)	380-400 VAC 3P+N+PE 50/60hz	15 kW	3500 kg
