

**CORPORATE
PROFILE**

ABOUT US

INOX-FER is an Italian company that designs, manufactures and sells customised mixing and cooking systems. We are strategic suppliers for Italian and international SMEs and large companies in the **food processing sector**.

MISSION

We work closely with technical consultants, retailers and food processing companies to achieve the **highest levels of customisation** for each plant.

More than **1000**
customers served

More than **300**
plants implemented in
the last 6 years

More than **40**
years' experience

HISTORY

SECTORS

dairy
cured meats
preserves
glazes and toppings
jams and marmalades
sauces, condiments and creams
no food: chemical and textile

meat processing

INOX-FER was founded in 1981 as a company to design and manufacture machinery for the meat industry. Our experience and know-how have allowed us to develop our business over the years, exploring new sectors and technology.

New solutions. **ProCut
Industrial** founded

2021

Expansion of product
range. Launch of **ProCut
Easy** line

FUTURE

VISION

WE BELIEVE IN VALUABLE RELATIONSHIPS

Our ongoing commitment is to keep the promise of quality that we make to manufacturers, technical consultants and specialised resellers of machinery for the food industry.

Establishing lasting international partnerships to export **Made in Italy** value is how we see the future of our company.

PRODUCTS

MIXING PLANTS

Machinery used to dissolve various types of solid ingredients in a liquid quickly and homogeneously.

PROMIX, STANDARD MIXERS
TMV & DR DISSOLVERS

COOKING SYSTEMS

Machinery used for cooking, differentiated by cooking method and processing volume.

DOUBLE JACKETED STEAM KETTLE
COOKING KETTLE

INTEGRATED FOOD PROCESSING SYSTEMS

Complete plants used to transform the raw material into the product ready for packaging.

PROCUT INDUSTRIAL, PROCUT EASY
PROCUT OMNI

SERVICES

YOUR GOALS WILL BECOME OUR GOALS

Consultancy and feasibility study

After careful mapping of requirements, we carry out the preliminary technical and economic analysis that will guide the design.

Design and co-design

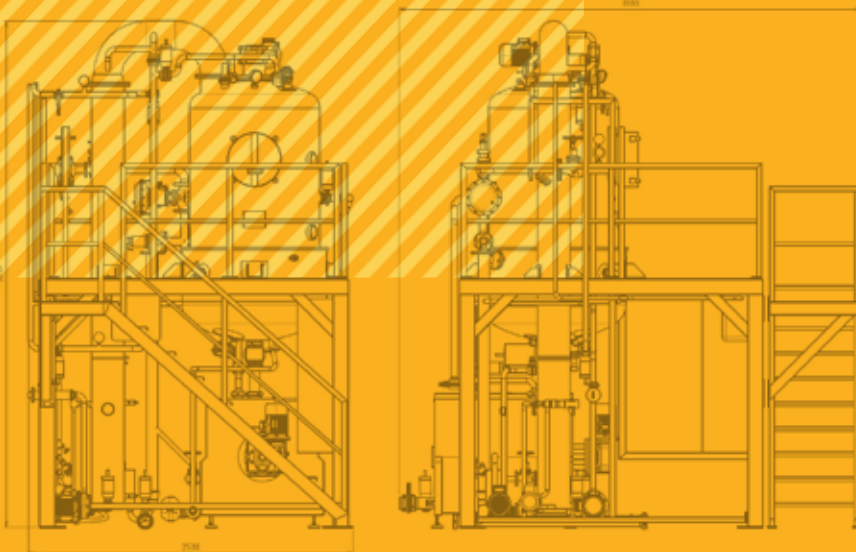

Together we design the most appropriate solution in terms of production volumes handled, production efficiency and desired characteristics of the end product.

Technical training

Once the plant is built and delivered, we are a point of reference for everything related to its operation. Inox-Fer technicians can give essential instructions to the personnel in charge of operating the machinery.

After-sales assistance

Our plants are made to last: the average life cycle is 20 years. Our team will support you for any spare parts needed over time and during maintenance.

APPLICATION SECTORS

INOX-FER solutions are successfully applied in the production of:

-  **CURED MEATS**
-  **PRESERVES**
-  **GLAZES AND TOPPINGS**
-  **DAIRY PRODUCTS**
-  **SAUCES**
-  **CONDIMENTS AND CREAMS**
-  **JAMS AND MARMALADES**
-  **NON-FOOD: CHEMICAL AND TEXTILE**

7.

TEAM

Each of our systems embodies all the know-how and commitment of the people who researched, designed and built it.

WHY CHOOSE INOX-FER?

- We design tailored systems
- We solve your process problems
- We build systems made to last
- We consider the safety of your operators
