

Machinery and processing lines

For the production
of fruit juices and
concentrates from
apples, berries and
vegetables

- Reception lines, mills, mash heaters, hydraulic presses
- membran filter, adsorbers, evaporator and aroma plants
- CIP, process- and storage tanks
- Engineering, installation and start-up
- World wide experience and proven designs

Bucher Unipektin has manufactured and supplied machinery and processing lines for the production of cloudy NFC fruit juices and fruit juice concentrates since decades. Our core competence is the production of juices from apples, pears, grapes, black & red currants, pomegranates, cherries, cranberries and elderberries and different kind of vegetables. The core markets for our adsorber and ion exchange technology are citrus and pineapple products.

Bucher Unipektin supplies equipment for small processors with an hourly through put between 1 and 5t/h as well as industrial scale processing lines with throughputs from 5 to more than 100 t/h.

Bucher Unipektin manufactures all required key machinery for juice production such as: Reception lines, mills, mash heaters, hydraulic presses, membran filters, adsorbers, ion exchangers, evaporators, aroma plants and process- and storage tanks.

Furthermore we plan and supply the required peripheral equipment of a juice plant including piping and control systems.

We are known for our innovative products and our fruit juice technological Knowledge. The universally known «Swiss» quality and reliability gives you the confidence to run a factory that can successfully compete internationally. In particular the extraction efficiency of our presses and extractors is outstanding and unbeaten.

Offices and agents in major juice producing countries will assist and support you concerning the local circumstances including financing, local supply of components and technical know-how.

Our engineering and planning teams have extensive experience in the realisation of capital investment projects all around the world. Experienced service technicians will take care of the installation and start-up and assist you during production if required.
