

KAGETEC
by van koetsveld & grimberg

The revolutionary grout technology,
that redefines your process hygiene

KAGETEC ONE

First unveiled at Drinktec, our new, patent-pending joint technology is setting new standards in hygiene.

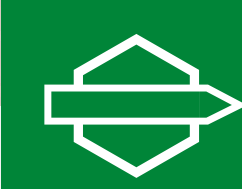

Smooth & low-porosity – no penetration of germs & dirt, no biofilm

Flush with the surface – no residues in rough indentations

Liquid-impermeable – no soaking, no bacterial nests

Strong edge adhesion – maximum stability & durability

Optionally conductive – even under low humidity

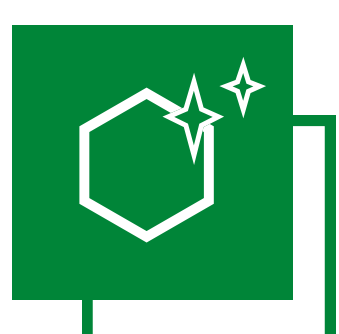

Future-Oriented

Hygiene problems are among the greatest risks in food and beverage production.

They endanger safety, efficiency, and audits. With KAGETEC ONE, you eliminate these risks permanently, reduce cleaning effort, and cut costs. What begins as a technical solution becomes a strategic investment – strengthening your process hygiene today and safeguarding it for tomorrow's requirements.

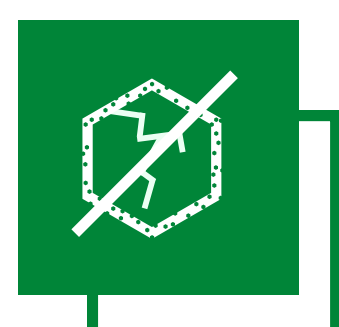

Your New Standard

Unmatched Hygiene

Smooth, low-porosity, flush, and liquid-impermeable. No biofilm, no soaking, no hygiene risks.

Maximum Stability

Strong edge adhesion prevents edge breakouts and washouts – even under continuous mechanical stress.

Simply Clean

The smooth surface reduces cleaning effort, saves time, chemicals, and energy – and ensures audit-proof results.

Problem-Solver

For your most extreme production areas, we also offer KAGETEC ONE in a unique high-temperature and chemical-resistant version:

Heat-Resistant – long-term safety up to 165 °C

Highly resistant – against sugar, fats, alkalis & acids
