

PALLET CHANGING IN LESS THAN 30 SECONDS

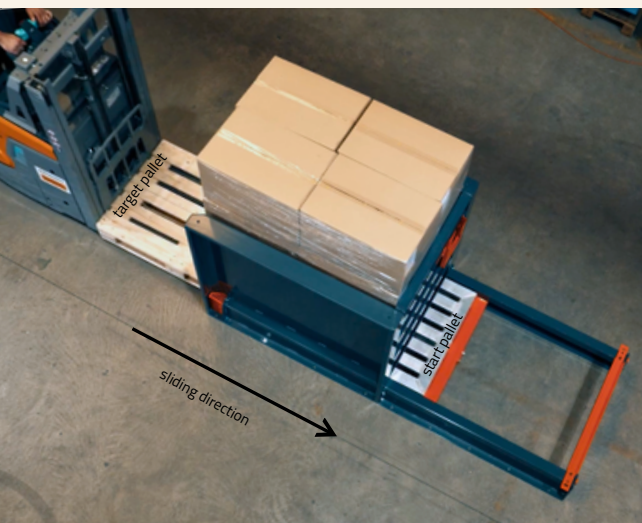

– an industry innovation
made in Germany

www.sw-paratus.com

THE PARATUS® METHOD

To change pallets on our patented PARATUS® Change, you insert the loaded start pallet, pick up the target pallet with your industrial truck and use it to push the start pallet out to the rear. Within a few seconds, the goods are on the target pallet - without tilting, turning or squeezing.

ABOUT US

What started as an idea over a drink became a revolution in the logistics industry: Ralf Schauties and Lars Wellerdiek developed an innovative pallet changer for their own use.

Today, more than 750 companies worldwide have optimised their daily processes with a PARATUS® pallet changer.

- 2015** building & testing prototypes
- 2016** application of the patent
- 2017** 1st time as an exhibitor at the LogiMAT (Stuttgart)
- 2019** launch of today's PARATUS® Change CLASSIC
- 2021** building up the team & starting global sales
- 2023** launch of the fast and silent automatic pallet magazine PARATUS® Stack LIFTER
