

Founded in 1931 in Munich as a refrigeration equipment manufacturer, our rise to being known as global experts in commercial cooling and industrial refrigeration is a result of our constant drive to evolve. We now manufacture our cooling systems in plants across Europe, Asia and the Americas and operate all over the world.

ESSENTIAL FOR OUR DAILY LIFE

We're proud of our global reach, and we're embedded in industries all around the world with the specialist heat exchange solutions we manufacture.

From food cooling and comfortable air conditioning in office buildings to data centre cooling solutions and energy & power cooling, Güntner touches the lives of millions.
