The Year, 2025

A Decade of Growth. A Future of Innovation.

Since our inception in 2013 and opening our factory in 2015, our journey has been marked by continuous progress and meaningful milestones. In February 2025, we proudly celebrated our 10th anniversary of our manufacturing facility — a decade of dedication to quality, innovation, and sustainability.

From a modest beginning of producing 2,000 plates per day, Adaaya has grown exponentially, now manufacturing 60,000 palm leaf plates daily. Our state-of-the-art production facility spans 40,000 square feet, enabling us to meet the ever-growing global demand.

Monthly shipments have also scaled significantly, with 7 containers now dispatched each month — a testament to our expanding market presence. The number of punching molds has increased from just 20 in 2015 to an impressive 689 today, showcasing our commitment to engineering excellence and continuous improvement.

Today, Adaaya proudly serves customers in 32 countries across the globe. Our growth from a local manufacturer to a trusted international brand is a reflection of the enduring relationships we've built and the confidence our partners place in us.

As we step into 2025, Adaaya is evolving. What began as a manufacturing unit is now transitioning into a Technical Engineering company, mastering the craftsmanship of palm leaf tableware. This transformation reflects not just our growth, but our vision to lead the industry with innovation and purpose.

In tribute to the rural women who have been the backbone of our journey since day one, we proudly unveil our new brand logo — placing women at the heart of our identity.

We extend our heartfelt thanks for your unwavering support as we continue our mission to build a greener, more sustainable future.

Warm Regards,
T. Harsh & Roli
