

Trepko

I 00 series

in-line machines: aseptic, ultra clean, standard

- available up to 16-lane versions
- double indexing as an option
- efficiency up to 70.000 cups/h
- robust mechanical construction
- modern drive & control system
- three levels of hygiene: Standard, Ultra Clean, ASEPTIC
- fast & easy change-over with automated options (Ultra Flex)
- efficiency enhancement options
- variety of filled products
- different closing facilities
- integration with end of line solutions (700 Series)

200 series

rotary filling and closing machines for pre-formed containers

- 4 frame sizes
- available up to 6-lane versions
- efficiency up to 14 000 cups/h
- compact, reliable design
- flexibility,
- modern drive & control system
- variety of hygienic options
- fast & easy changeover
- efficiency enhancement options
- variety of filled products
- different closing facilities
- integration with end of line solutions (700 Series)

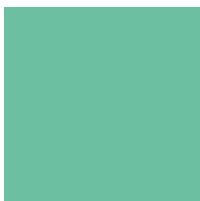

300 series

filling & coagulation plants for U.F. white cheese

- output up to 10.000 cups/h
- combination of mechanical and modern servo technology drives
- fixed cups' position
- safe and easy operation
- low maintenance costs and long life-time
- integration with end of line solutions (700 Series)

Three basic modules:

- filling module
- coagulation tunnel
- salting and closing module

3000 series

bottle filling machines, rinsers, fillers, cappers

- capacity up to 48,000 BPH
- suitable for a variety of products
- capable of handling different size bottles
- designed to allow for quick changeover to new sizes
- flexibility in design, manufacture and operation
- meets strict hygienic standards - 3A and EHEDG

Higienic options

- HEPA filters for an ultra clean filling environment
- cap rinse elevator with sterilize
- various bottle rinsers
- CIP and SIP systems
- water filters
- air filters

400 series

flexible container handling systems

Typical applications

- Bulk Salads Line
- Multi-fill desserts
- High Speed Filling Lines
- Vodka Shots
- Contact Lenses

Cardboard skilket sealing solution:

- output up to 7200 skillets/h
- single and dual index
- fully automatic
- simple and quick changeover
- a variety of skillets possible

500 series

carousel machines

- single or twin lane format
- capacity up to 5000 cups/h
- multi-fill applications for liquid, semi-liquid, dry products
- quick and easy changeover between different packaging size
- efficiency enhancement options
- various hygienic options
- integration with end of line solutions (700 Series)

700 series

end of line solutions

710 series - wrap around machines

720 series - tray erecting machines

730 series - shrink wrappers

740 series - palletisers

750 series - trad conveyor systems

760 series - pick & place robots

780 series - box cartoning machines

- high efficiency
- low power consumption
- modular designed for high flexibility
- easy to maintain and operate

800 series

brick forming and wrapping machines

- high packaging quality
- variety of bricks sizes and shapes
- different in-feed options
- various products to be handled (butter, margarine, tvorog, minced meat, lard, yeast etc.)
- enhanced hygienic conditions
- easy operation and maintenance
- integration with end of line solutions (700 Series)

9000 series

forming, filling and sealing machines

- available up to 16-lane versions
- output up to 24.000 packs/h
- variety of cup sizes and shapes
- variety of hygienic options
- variety of filled products: butter, margarine, jam, honey, yoghurts and other spreadable condiments
- integration with end of line solutions (700 Series)

600 series

bag in box lines

The basic modules:

- 610 Series - Automatic Case Erector
 - 620 Series - Bag in Box Maker & Inserter
 - 630 Series - Weigh Filler
 - 640 Series - Bag in Box Closer & Sealer
-
- Quick and easy format change allow for wide case range
 - Easy cleaning
 - Bags made on the machine
 - Automatic cip system
 - Full control of sealing time, temperature and pressure

850 series

bulk filling, forming & wrapping lines

851 Model

- Forming & Wrapping Plates up to 2 kg

852 Model

- Forming & Wrapping bars, bricks or cubes up to 10 kg
- fully automatic, servo-driven packaging process
- designed to fill and wrap butter, margarine and edible fats
- various shapes and dimension of plate and cubes

The 850 Series can be perfectly integrated with the comprehensive range of the TREPKO end of line solutions (700 Series).
