# Make Some **Delicious** Recipe's

## **CORN FLOUR**

Corn flour is a fine powder made from ground corn, often used in baking and cooking. It is ideal for creating light and fluffy baked goods. Unlike corn starch, which is primarily used as a thickening agent, corn flour has a more versatile cooking application.

## **CHINA GRASS**

Plain

China grass, also known as agar-agar or kanten, is a gelatinous substance derived from seaweed. It is commonly used in culinary applications, particularly in desserts and jellies, due to its ability to set liquids.

## **GELATINE**

Food Grade

Food Grade Gelatin is an ingredient commonly used in cooking and baking as a stabilizer, thickener, and texturizer for various foods, including jellies, desserts, and puddings.

## **CUSTARD POWDER**

VANILLA FLAVOUR

Custard powder with vanilla flavor is a vegetarian product that can be used to make smooth, velvety custards, delicious puddings, and creamy ice creams. It typically requires mixing with milk and sugar to prepare desserts.
