

LLAO
Grupo Industrial

**Transforming the
industry through
innovation**

grupollao.com

Llao Grupo Industrial is an industrial group for development of processing units for high quality products.

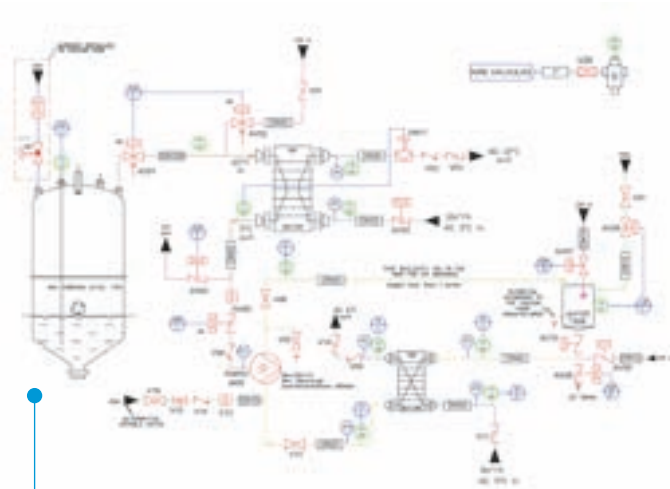

Our goal is create high value-added solutions to improve our clients' production processes, based on food safety, energy efficiency, and maintenance.

Llao Grupo Industrial is a continuously expanding organization distinguished by its ability to execute projects with the highest standards of safety, precision, and efficiency. Backed by strong technical expertise, we provide innovative and competitive solutions designed to meet the evolving needs of our clients.

Engineering

Process engineering is the heart of every solution we develop, ensuring that every stage of production is optimized to deliver maximum efficiency, quality, and sustainability. Backed by years of experience, we systematically analyze and improve every aspect of industrial manufacturing, from initial design to on-time operation, always developing applications tailored to our clients' needs.

P&ID example

Our detailed approach to engineering ensures that each machine or system is highly reliable, efficient, and adaptable to the demands of the industry.

Production

In our two production facilities, quality and precision are our priority. We use advanced manufacturing processes and state-of-the-art machinery to transform complex designs into high-performance industrial equipment.

Palletizer with
anthropomorphic robot

Every stage of the production process is carried out under strict quality controls to ensure that each product meets technical specifications and international safety standards.

Sugar packet palletizer

Pasteurizer and vacuum process

After-Sales

The satisfaction and continued success of our customers are our priority, which is why we offer comprehensive after-sales service that includes technical support, preventive and corrective maintenance, and the availability of genuine spare parts.

Our staff is always available to provide prompt and efficient assistance, ensuring that all equipment continues to operate at peak performance. This way, our customers feel confident working with a reliable partner who supports their operations and ensures the longevity and efficiency of their investments.

➤ Key projects developed throughout our history:

Processing solutions.

- Mixing and Dissolution of Ingredients, in a batch weighing system for the precise metering and mixing of raw ingredients.

- Kitchen for cooking with steam, and vacuum process.

Packaging.

- › Palletizer with anthropomorphic robot.
- › Sugar packet palletizer.

CIP/SIP units, designed to control the key cleaning parameters.

Turnkey solutions for food industry processes.

Honey Barrel Processing Facility.

- › Barrel Defrosting Tunnel.
- › Crusher for honey barrel defrosting.
- › Honey melting unit with heat exchanger.
- › Filtering.
- › Honey Pasteurizer.
- › Vacuum unit for air bubble removal.
