

Purity & Quality

About Us:

Oil Tec founded in 1999. As a fully Egyptian owned enterprise, built on a heritage of experience in the oils and soap sectors since 1940. Facilities loang forerunners decaded or professional soap manufacturing of experience basis, then engaged in oils refining, mixing, filling of edible oils, vegetable ghee, shortening and oldstic bottles manufacturing to achieve a comoleted safe foodstrift oil production.

Refining: We are considered to be

the most advanced in terms of machinery and refining technology through all refining processes (Neutralization -Bleaching - Deodorizing -Winterizing) with montly capacity 10,000 MT.

Plastic Bottle Manufacturing:

Production of plastic bottles in the same place of packing to ensure best hygiene products to meet international food safety standards.

Oils Processing: All production and filling

All production and filling lines are fully automated which enables us to present a nutritional oils, ghee and shortening with a longer shelf life and better taste.

· Full compliance with all legislation and laws.

Soap Manufacturing: Saponification process are

Saponification process are made from the finest edible oils with the capability to produce soaps different ranges, colors and perfumes with finishing in different sizes and packages.

The Most Advanced Hygienic

Oll, Shortening and Vegetable Chee Filling System The Most Advanced Hygienic Oil, Shortening and Vegetable Ghee Filling System

Sustainability

We are committed to doing our effort and capabilities and using our scale to help lead the Industry of refining & filling of edible oils forward.

Our sustainability commitments are guided by activities across three main core pillars:

- Action to reduce pollutants that effect of the climate.
- Supply Chains Responsibility
- The Accountability.

These drive the step-to-step business decisions to make across our operations.

We are advancing our sustainability efforts by progressing toward our existing sustainability commitments, while also setting additional targets and investing in the new projects that are centered in sustainability & green life. We believe these efforts will result in good climate action while strong results for our key stakeholders, including customers, employees and shareholders.

Environmental Goals

- Oil Tec continued efforts to improve energy efficiency such as implementing steam reuse methodologies in heating the oil system and updating performance systems in all our operations.
- Oil Tec changed all steam boiler lighters from diesel to natural gas, & adjusting the combustion system which leads to the reduction of carbon emissions and environmental pollution.
 Oil Tec supply chains organized the supply process for service providers from the industrial zone in Sadat
- City, thus reducing the movement of cars, reducing carbon emissions, reducing the number of operating hours for cars, and thus reducing the number of times to change car motor oils.

 Oil Top operations team have policies and procedures in place that determine the correct operation related
- Oil Toc operations team have policies and procedures in place that determine the correct operation related to waste management. For this purpose, we conduct critical analysis tests to verify performance, with measurement on scales and laboratory analysis of effluents.
- Oil Tec works on the treatment of industrial wastewater in a scientific way to obtain water that conforms to the legislation and laws, used for irrigation around the company, and used for washing floors, thus reducing the consumption of city water.
- Oil Tec collects mineral oils resulting from changing motor oils for equipment and cars, and delivers them
 to petrol stations to be disposed of in their treatment units.
- Oil Tee collects the by-products resulting from refining edible cits, which were previously considered inclustrial vasets, such as muciage. Where these wastes are seen to the sister company Oleo Mire for Oleo Chemicals, where it is in charge of reusing these wastes and producing acid oil as well as various fatty saids.
- Oil Tec collects hazardous waste and delivers it to Nasiriyah landfill for safe disposal. There is also a contract with service providers accredited by environmental affairs to safely dispose of non-hazardous waste.
- Oil Toe works on the necessity of conformity with legislation and laws and allows all official bodies to conduct periodic reviews and draw samples to confirm conformity. It also allows customers to conduct periodic reviews and take all corrective and preventive actions on a permanent basis to ensure compliance with besidation, laws and other requirements to stakeholders and success nation.
