Unveiling Our
Journey:

Crafting Excellence
in manufacturing,
supplying &
exporting of dried
fruit & nuts.

10+ Years Experience

*Make healthy
life with us*

Our Story:

Behind the Scenes:

FROM PASSION TO
EXCELLENCE

The Visionaries Fueling
Our Success

Who We are?

We run a family business, and it all began with our fascination with our father's date plantations.

We started out as two young siblings who exported dates from our father's garden using the meager resources we had available to us. We worked very hard and diligently to build strong connections with foreign business partners and find new markets to expand our exports.

OUR VISION

in our vision, social responsibility and environmental preservation are paramount for an export company. We are committed to improving working conditions, upholding human rights, responsibly utilizing resources, and reducing environmental impact. Our focus is on creating a sustainable and better future for our society.

OUR MISSION

supply, packaging and marketing of dates, pistachios, figs, raisins and their products with high quality based on food safety and security all over the world.

Through this exciting mission, as an export company, we provide trust and assurance to our customers that by choosing us, they have a reliable partner in the global market.

A still life photograph featuring a white ceramic bowl with a perforated pattern, filled with golden-brown Persian dates. A branch of a date tree with small, dried flowers is placed in the bowl. In the background, a white lantern with a star-shaped cutout is visible. In the foreground, there are pink carnations and a glass of white milk. The scene is set on a wooden surface.
